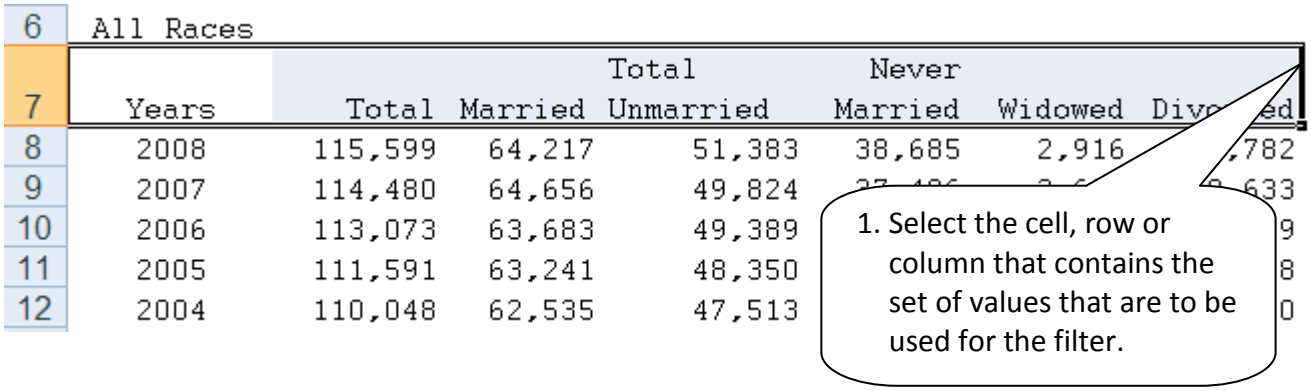
How do I filter data?

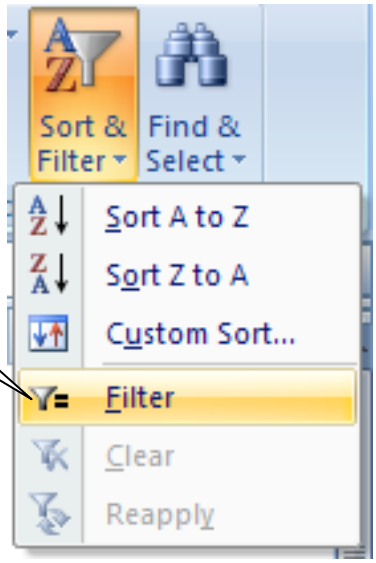
If the data contains values, rows, or columns that are important but not relevant for display or inclusion in graphical presentations, the filter option can be used to hide this information.

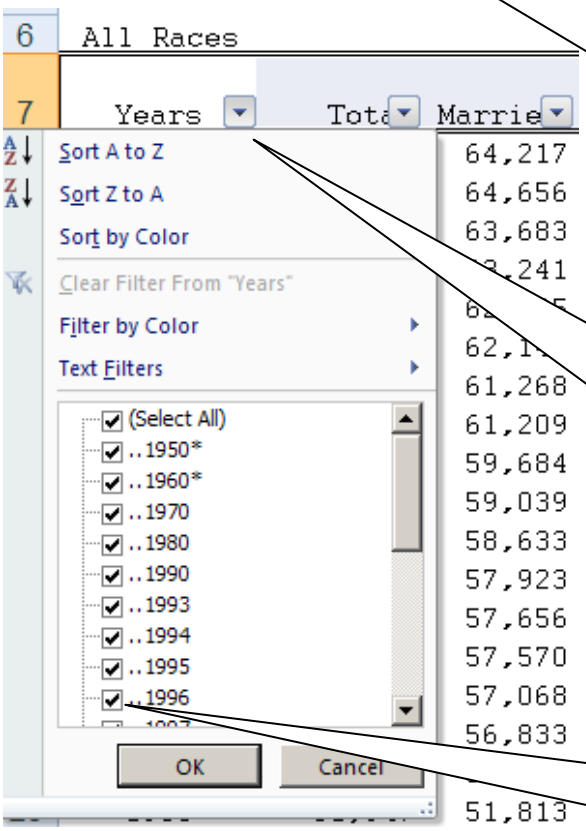


6	All Races					
7	Years	Total	Married	Total Unmarried	Never Married	Widowed
8	2008	115,599	64,217	51,383	38,685	2,916
9	2007	114,480	64,656	49,824		
10	2006	113,073	63,683	49,389		
11	2005	111,591	63,241	48,350		
12	2004	110,048	62,535	47,513		

1. Select the cell, row or column that contains the set of values that are to be used for the filter.

2. Click on the SORT & FILTER button, select Filter.





3. Drop-down tabs appear in the bottom right-hand corner of each of cell if a cell or row is selected. If a column is selected then a single tab appears in the first cell of the column.

4. Selecting the desired drop-down tab and un-checking the relevant check-boxes hides the corresponding **row** values.

Years	MALES					
			Unmarried			
	Total	Married	Total Unmarried	Never Married	Widowed	Divorced
All Races						
2008	115,599	64,217	51,383	38,685	2,916	9,782
2000	103,114	59,684	43,429	32,253	2,604	8,572
1990	91,955	55,833	36,121	27,505	2,333	6,283
1980	81,947	51,813	30,134	24,227	1,977	3,930
1970	70,559	47,109	23,450	19,832	2,051	1,567
1960*	60,273	41,781	18,492	15,274	2,112	1,106
