Quantitative Literacy

3		

Humanities and the Arts

3		

Natural Sciences

3		

Social and Behavioral Sciences

3		

Complete a total of 30 hours of general requirements by selecting additional courses. Students planning to complete a bachelors degree should take courses that are designated as Cultural Diversity in the U.S. and International Perspective.

The Associate of Technical Study degree is awarded for successful completion of an individually planned technical education program at BGSU Firelands. The program must have an area of concentration in a field that is clearly identifiable as a career objective.

The area of concentration can be formed either by:

- A coherent combination of technical courses selectively drawn from two or more technical programs currently offered by BGSU Firelands College to serve a career objective which would not be adequately addressed by one of the existing programs; or by
- Courses completed or training received at other institutions of higher education, vocational centers, and/or other educational enterprises judged by BGSU Firelands to be of college level and worthy of college credit.

Technical Studies -- Studies will complete the degree plan on the back of this checksheet, including advisor signature, to determine the technical courses for this degree.

Total 32 credit hours

The development of the educational plan will be done jointly by the student and an academic advisor. Each candidate for this degree must complete an Associate of Technical Study application which identifies the area(s) of concentration and designates courses to be taken to complete the degree. The application will be forwarded to the Academic Review Board for review and approval. Any changes in the educational plan will require the signature of the academic advisor and concurrence of the Academic Review Board. A student unable or unwilling to meet the college degree requirements, or who has submitted a proposal deemed unacceptable, will be denied admission into the program

- This degree is awarded for satisfactory completion of a minimum of 62 semester credit hours.
