## Recycling Contamination is scary!

Please Recycle:		Do NOT Recycle:	
 Aluminum Cans	 Cardboard (Clean and Dry)	 Takeout Containers	 Food products and ANY liquids
 Plastic Bottles	 Glass Bottles and Jars	 Paper Towels/Napkins/Tissues	 Plastic Bags (Except in bins labeled "Plastic bags ONLY")
 Notebook/Office Paper			

Recycling contamination is **problematic** and **expensive** because it can cause recyclable materials to be **sent to the landfill**, it can **clog sorting machinery**, and **decrease the quality** of recycled product materials.

Sustainability means “meeting the needs of the present without compromising the ability of future generations to meet their own needs.”
