Campus Race to Zero Waste

is a friendly competition between college and university sustainability programs across North America to promote waste reduction activities in their campus communities! This February & March, BGSU will compete in three categories to reduce, reuse, and recycle the most waste!

Last year, BGSU ranked 72nd in the national competition, and had a recycling rate of 38.027%. Help us beat our high score and reach the next level in waste reduction this year!

Category 1 *Diversion*

The Diversion category is for campuses that have the ability to track and report weights on recyclables, food organics, & trash on a weekly basis to divert waste from the landfill through reduction and recycling strategies.

Category 2 *Electronic Recycling*

Electronic Recycling is a special category that tracks the amount of computers, printers, consumer electronics, & other e-waste scrap that are collected on campus and in the local community.

Category 3 *One-Building Challenge*

The One-Building Challenge is designed to help schools focus and test their zero-waste efforts on one building and compare results with other campuses. Comparisons are based on the diversion rate for the building.
