

Marital Status in the U.S., 2008

Change in Marital Status in the U.S., 1970-2008

- Since 1970, the percentage of Americans that are married has decreased while the percentage that are divorced has increased (Figure 1).
 - » The percent of Americans that are married has decreased from 64.2 in 1970 to 51.9 in 2008, a 20% decline.
 - » The percent of Americans that are divorced has increased from 2.9 in 1970 to 10.7 in 2008, more than a three-fold increase.
 - » The percent of Americans that are never-married has modestly increased from 24.9 in 1970 to 31.2 in 2008.

Variation in Marital Status According to Race and Ethnicity, 2008

- Most Asian-Americans (60.7%) and Whites (55.1%) are married. Nearly half of Hispanics (49.9%) and a minority of Blacks (34.6%) are married.
- The percent divorced is lowest among Asian-Americans (5.2), followed by Hispanics (8.1), Whites (11.3), and Blacks (11.7). Blacks and Whites are more than twice as likely as Asians to be divorced.
- Nearly one out of two (47.6%) Blacks are never married, followed by Hispanics (38.4%), and more than one-quarter of Asian-Americans (29.4%), and Whites (26.7%).

Family Profiles examine topics related to NCFMR's core research themes. Data are presented at both the national and state levels using new data sources. Written for both researchers and broad communities, these profiles summarize the latest statistics on U.S. families.

Proportion of the U.S. Population Married: Geographic Variation in Marriage

- Among all fifty states, Idaho ranks number one with 58.3% currently married (Table 1).
- States with the highest proportion of their population married tend to be clustered in the West North Central Region (North Dakota, Kansas, Iowa, Nebraska, South Dakota, and Minnesota) (Figure 3).
- States with the lowest proportion of their population married tend to be located in the Western Region of the U.S. (New Mexico, Alaska, California, and Arizona) (Figure 3). Washington, DC, ranks last in terms of the percent of the population married (28.4%) (Table 1).

Figure 3: Geographic Variation of the Proportion of the U.S. Population Married, 2008

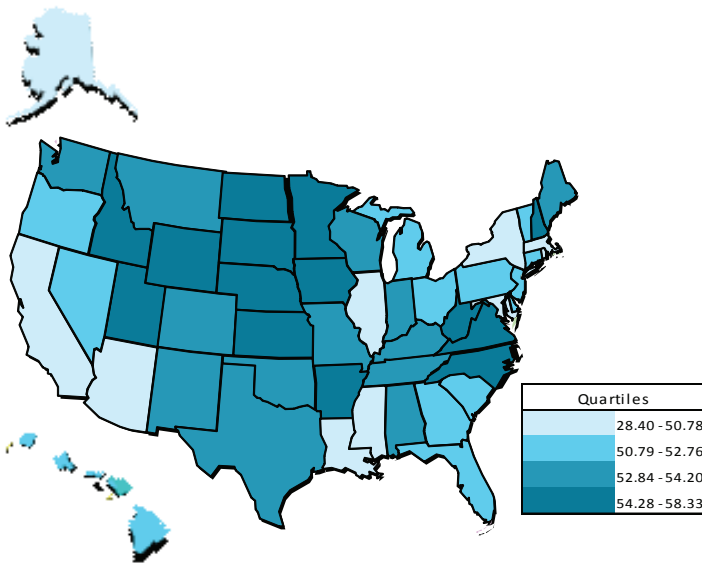

Table 1: Top and Bottom Five Ranking States: Proportion of Population Currently Married, 2008

Ranking	State	Percentage
1	Idaho	58.3
2	Utah	57.1
3	Wyoming	56.1
4	North Dakota	55.7
5	Kansas	55.6
U.S.		51.9
47	Louisiana	49.3
48	New Mexico	48.9
49	New York	48.4
50	Rhode Island	47.5
51	Wash, DC	28.4

Number of Marriages among the Ever-Married Population, 2008

- Three out of four of ever-married Americans have been married only one time, 19% twice, and 5% three times or more (Figure 4).
- Geographic variations exist in the frequency of marriage. Massachusetts and New Jersey both have the highest percent of men and women married only one time (84), while Oklahoma (66.2) and Arkansas (62.2) have the lowest (Table 3). Thirty-five percent of ever-married residents of Oklahoma, and 34% of ever-married residents of Arkansas have been married at least two times.
