

University Animal Facilities Fluid Restriction Daily Log Sheet

Daily monitoring (including weekends and holidays) of all animals placed on fluid restriction in conjunction with an IACUC approved animal care and use protocol must be conducted by personnel listed on the protocol.

This log sheet is to be maintained independent of records kept by the PI to record food/fluid consumption and daily weights, and must remain in the animal housing room at all times, for the entire period of food/ fluid restriction. For more information, please refer to revised IACUC policy 08-02-011, "IACUC Policy and Procedure Statement: Food/Fluid Restriction", for further information and description of approved procedures.

Protocol #: _____

PI: _____

Name of person monitoring
 restriction procedures: _____

Contact phone # _____

Date	Animal ID	Baseline Weight (animal weight prior to initiation of restriction procedures (grams))	Daily Animal Weight and Water Consumption Data					Initials
			Weight before consumption of daily water ration (grams)	Time water was provided	Time water was removed	Volume (ml) of water consumed	Weight after consumption of daily water ration (grams)
