Section I OVERVIEW

This Executive Summary provides a review of the sponsored program and research activity at Bowling Green State University for Fiscal Year (FY) 1999-2000 extending from July 1, 1999 through June 30, 2000. During FY 1999-2000, 381 proposals were submitted to external sources for a total request of \$27,817,193. Outlined below (Table 1) are profiles of BGSU's faculty, administrative, and program staff activities resulting in submissions and awards. A total number of 201 awards was received for a total dollar amount of \$11,606,303. This level of funding reflects all awards reported to the Office of Sponsored Programs and Research.

By contrast, the Grants Accounting Office reports the following expenditures for this same time period (Table 2).

Table 2

Total Sponsored Research Dollars Expended	\$ 8,913,236

As the university moves forward in the research arena, it becomes increasingly important to view the institution's activities in a more comprehensive manner than strictly by the amount of dollars expended each year on research and sponsored programs. The numbers help us understand the strengths and serve as a measure of BGSU's overall commitment to research, scholarship, and sponsored program efforts.

This report looks at where the grant dollars originate, how they are dispersed among colleges, how they are divided among activity types, and how the annual activity measures historically. It gives a closer look at who conducts the activity as well as how the colleges have fared over time.

Of the \$11,606,303 awarded to BGSU by external agencies in FY 1999-2000, \$7,466,514 (65%) was received from Federal sources, \$3,032,663 (26%) from State sources, \$731,695 (7%) from Other sources, \$255,882 (2%) from Local sources, and \$119,549 (1%) from Industry sources (Figure 1).

Figure 1

Compared to FY 1998-1999, total award dollars increased by \$1,175,871 (11.3%). Federal awards increased from \$5.4M in FY 1998-1999 to \$7.5M in FY 1999-2000. State sources awarded \$1.6M in FY 1998-1999 as compared to \$3.0M in FY 1999-2000. This increase is attributed to the biennial influx of Research Challenge Funds to the University from the Ohio Board of Regents. Awards received from all other sources decreased from \$3.4M in FY 1998-1999 to \$1.1M in FY 1999-2000. This decrease is explained by this report's recognition of federal pass-through dollars as federal funding rather than as "other" funds.

The following table illustrates the fluctuations in funding levels for all of the University's colleges during FY 1999-2000 by comparing the percentage of the total dollars awarded to each college to those awarded in FY 1998-1999 (Table 3).

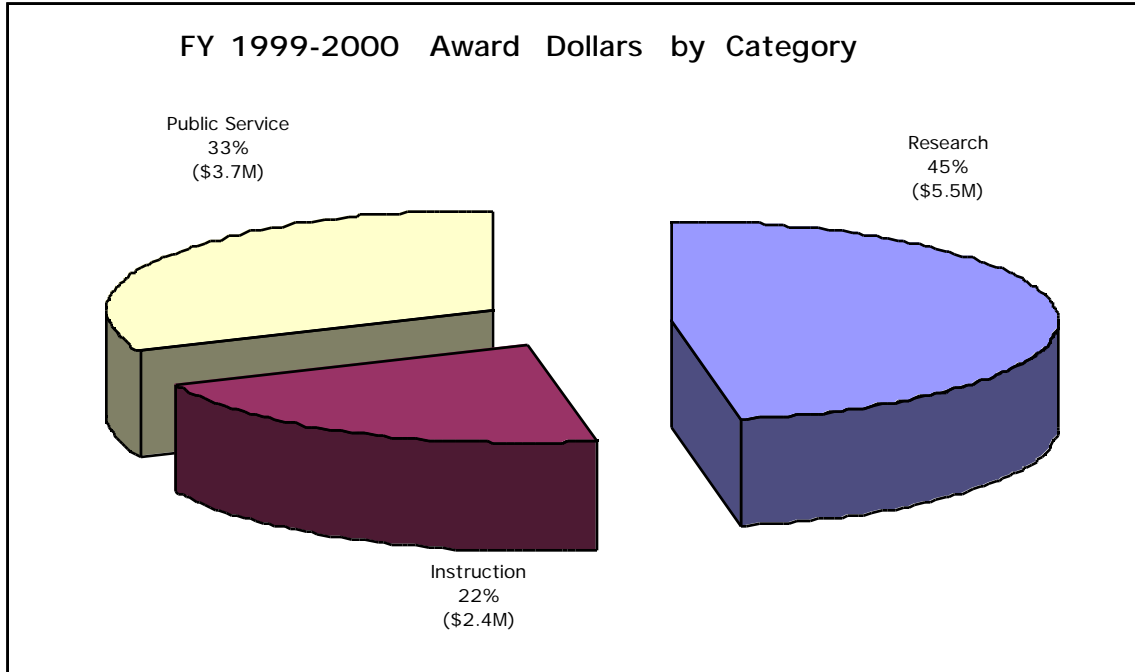

Table 3.

Summary of Awards by College: Percent of Total

College	% Total 98-99	%Total 99-00

	100%	100%

Of the funds secured, approximately 45% (\$5.5M) of the FY 1999-2000 dollars were awarded for research activities, the largest single category. This figure is slightly less than last year's 48%. Public Service awards were the second largest category at 33% (\$3.7M), an increase over the past 27%, followed by instructional activities at 22% (\$2.4M), a slight decrease from last year's 25%. (Figure 2).

Figure 2

The history of awards is better understood by examining crucial aspects that define and affect the funding process, such as: a) the fluctuation of award amounts due to the endings and initiations of multi-year projects, or increases in the numbers of awards but accompanying decreases in federal funding levels (Figure 3) and b) types of funding sources which mimic national funding trends (Figure 4).

An interesting perspective is created by the table above (Table 4). The table illustrates the number of faculty members at the various professional ranks with their involvement in the FY 1999-2000 sponsored program and research award activity.

5 YEAR HISTORY BY COLLEGE WITH DEPARTMENT TOTALS

A five (5) year history of individual college and department award totals below (Table 5). This history encompasses FY 1995-1996 through FY 1999-2000 and provides a total of all external awards during that time period. The data does not take into account programs that have been canceled, merged or moved between units.

Observations:

1. The U.S. Department of Education continues to provide the greatest source of federal funds to the institution, 26.5% of the total dollars and 6% of the total number of awards. The combined total of all federal agency awards accounts for the remaining 50.5% of the total dollars.
2. A review of the range of award amounts indicates that the average amount of an award is approximately \$50,000.
3. There are numerous relationships with local and regional organizations, and that many of these involve graduate internships/assistantships or practical experiences for our students.

Section V

Awards & Submissions by Academic College

The following section provides summary information regarding the number of awards and submissions, as well as awarded dollars, for each academic college. Please note that the scales used in each graph are different by college. Due to the wide range of numbers and dollars, it was difficult to represent the colleges on equal scales.

The College of Arts and Sciences and the College of Education and Human Development continue to be the leaders in both research and sponsored program activity. The teaching mission of the institution is well represented by the number of training and research grants that have both graduate and undergraduate student training as a focus. This success is one measure of university excellence.

The physical and life sciences have contributed greatly to the growth of the institution's research base over time. With the recent establishment of specific research centers of excellence and their ability to secure federal funding, this steady growth could increase over the next few years to a level that reflects regional and state excellence.

These graphs represent figures for the last ten fiscal years.

Academic Affairs

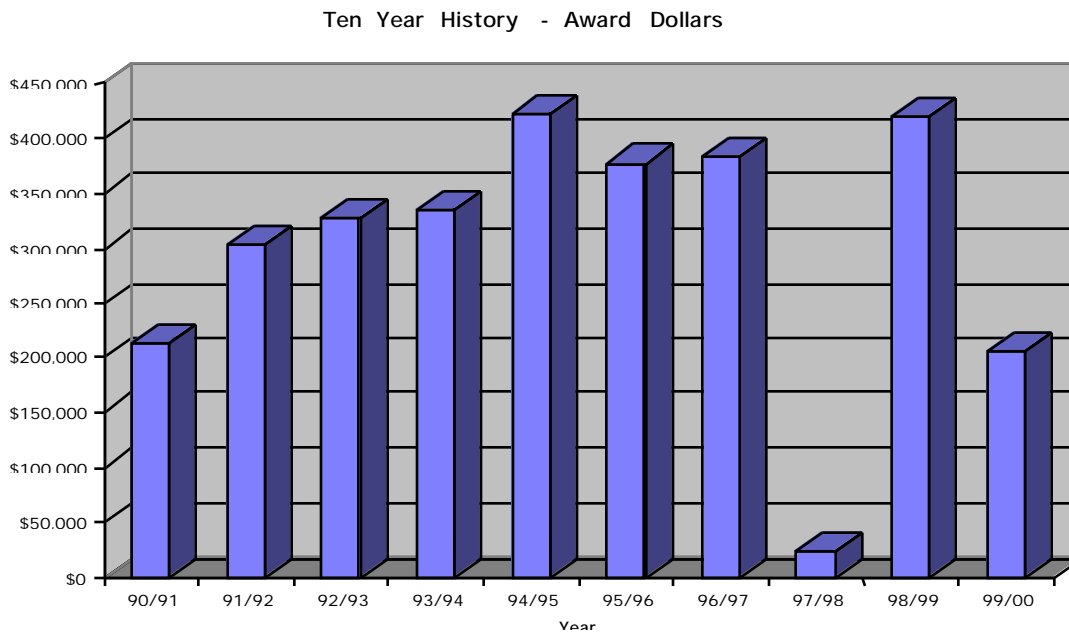

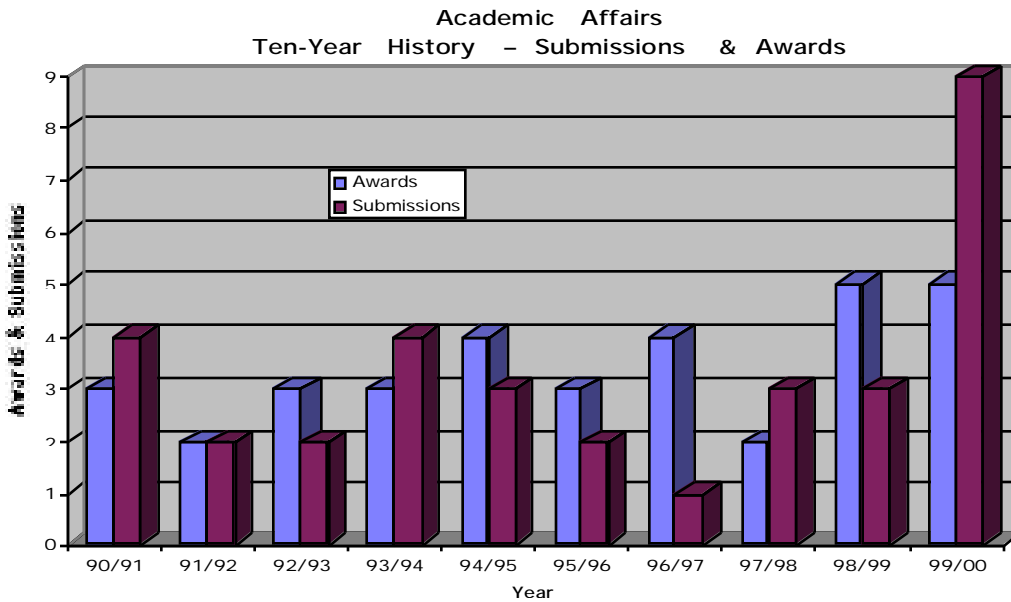

Fiscal Year 1999-2000

SUBMISSIONS: 9

AWARDS: 6

AWARD DOLLARS: \$205,936

Academic Affairs had a greater number of awards in FY1998-1999 than any time in the past ten year time period. During FY 1999-2000, there were 9 submissions for over \$1M, \$205,936 of which has been awarded while a remaining 3 proposals are pending action. A majority of the support dollars continue to come from the U.S. Department of Education.. Efforts in the area of innovative and transformative education have received particular attention.

Arts and Sciences

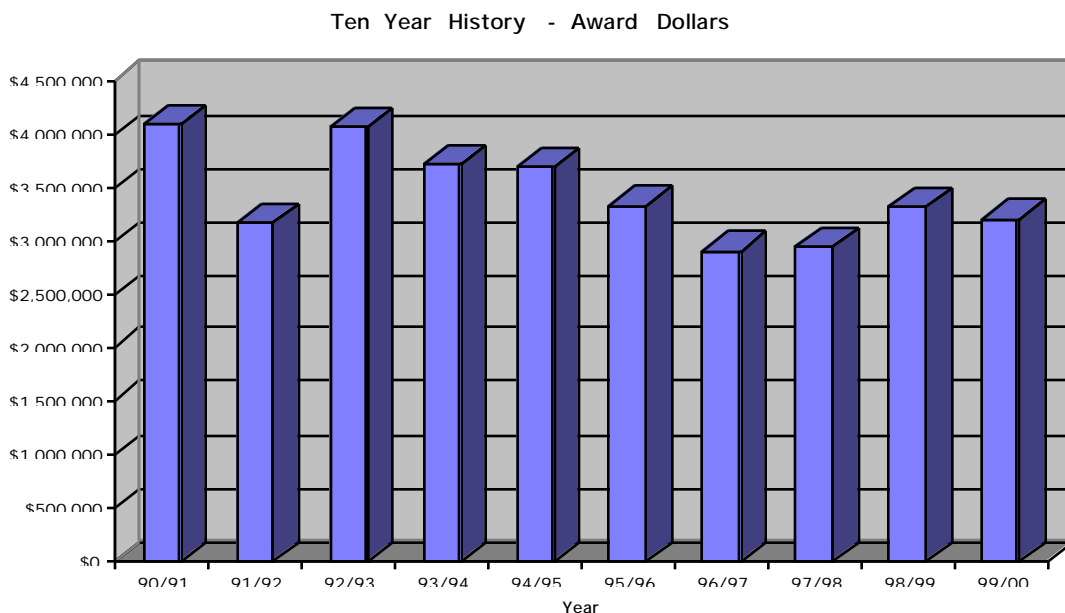

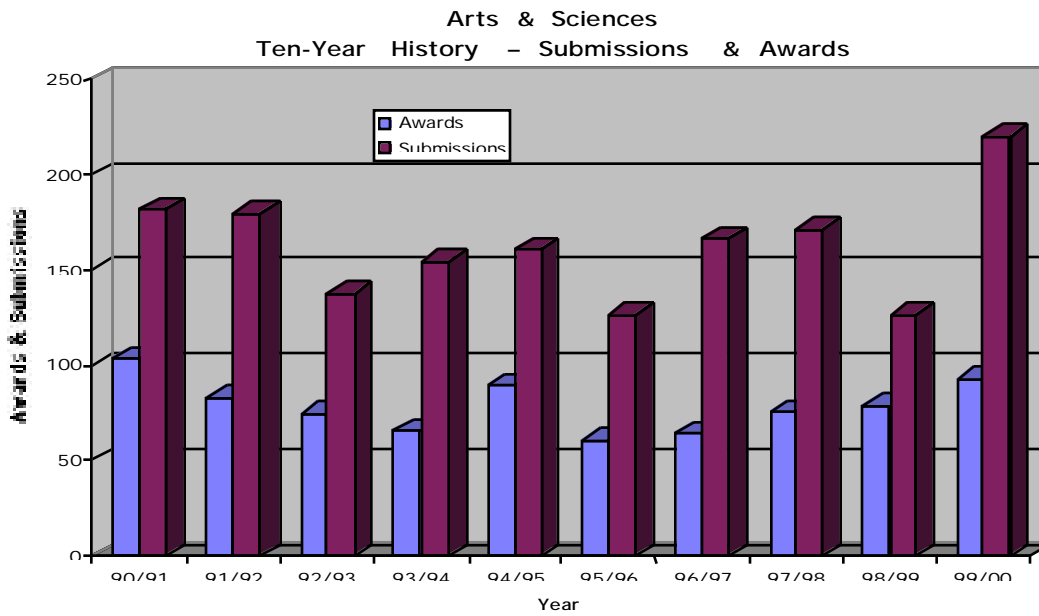

Fiscal Year 1999-2000

SUBMISSIONS: 220

AWARDS: 93

AWARD DOLLARS: \$3,221,334

The number of submissions by the College of Arts & Sciences nearly doubled over the last year, while awards increased by 18%. This dollar level has remained relatively consistent over the past ten years. Respectively, Biological Sciences, Psychology, Chemistry and Physics & Astronomy continue to be the dominant contributors to the college's external funding. The college focus for the future includes partnering with other colleges to effect inter-disciplinary collaborations that will leverage federal funding.

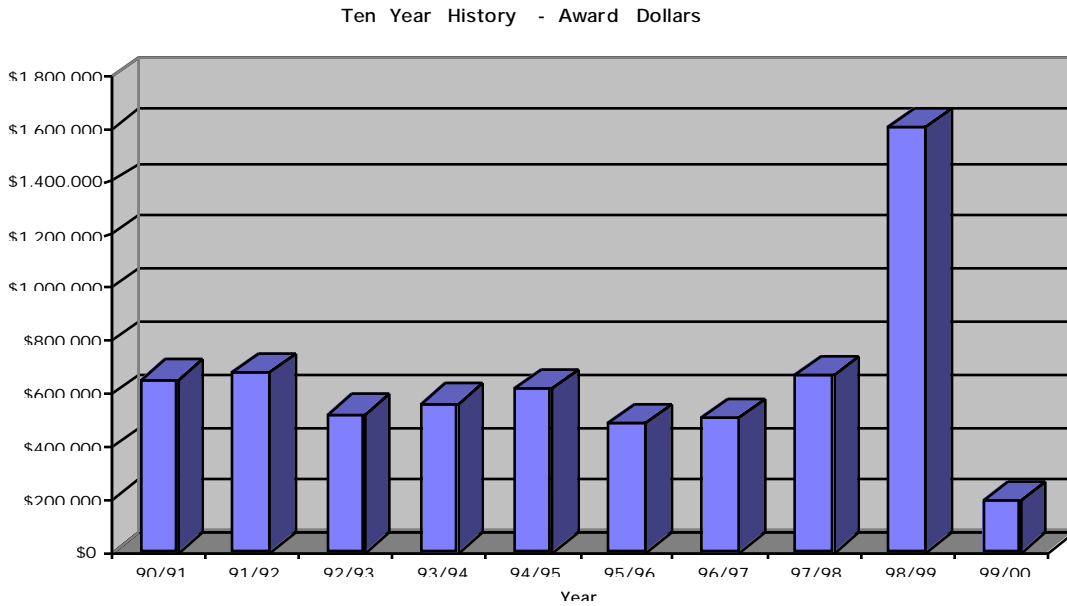

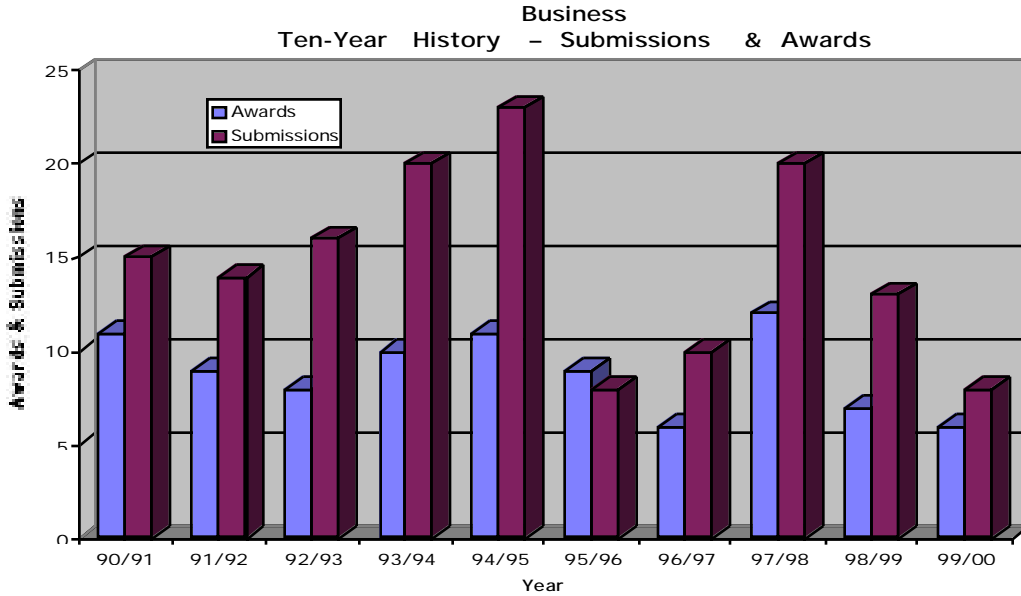

Business Administration

Fiscal Year 1999-2000

SUBMISSIONS: 8 AWARDS: 6 AWARD DOLLARS: \$182,262

Submissions decreased by 47% during FY 1999-2000. Award dollars show a sharp decrease from FY 1998-1999 due to the move of the Business Education Department along with a grant from the U.S. Department of Education to the College of Education and Human Services.

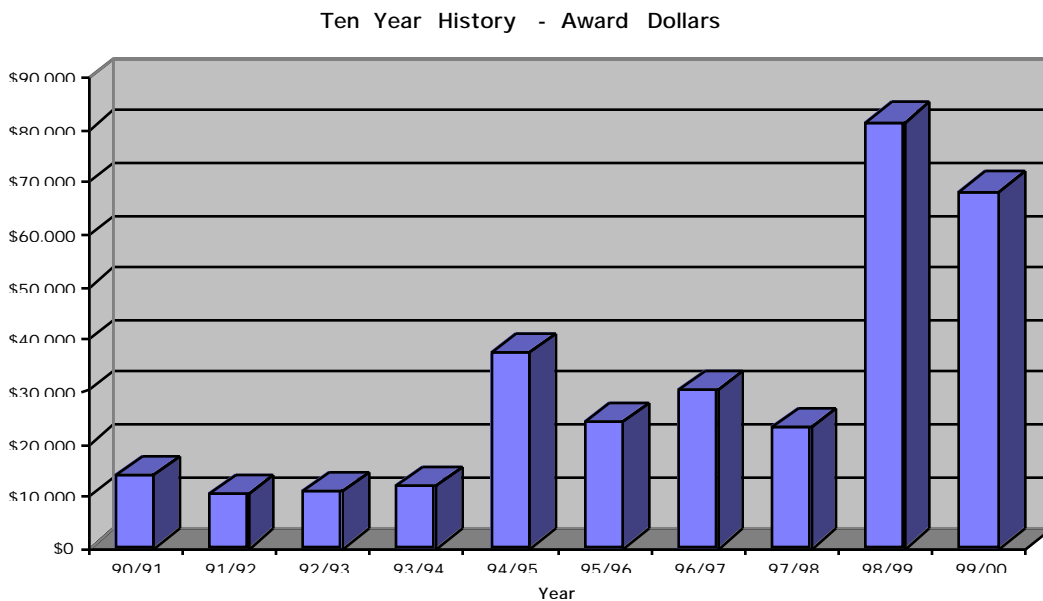

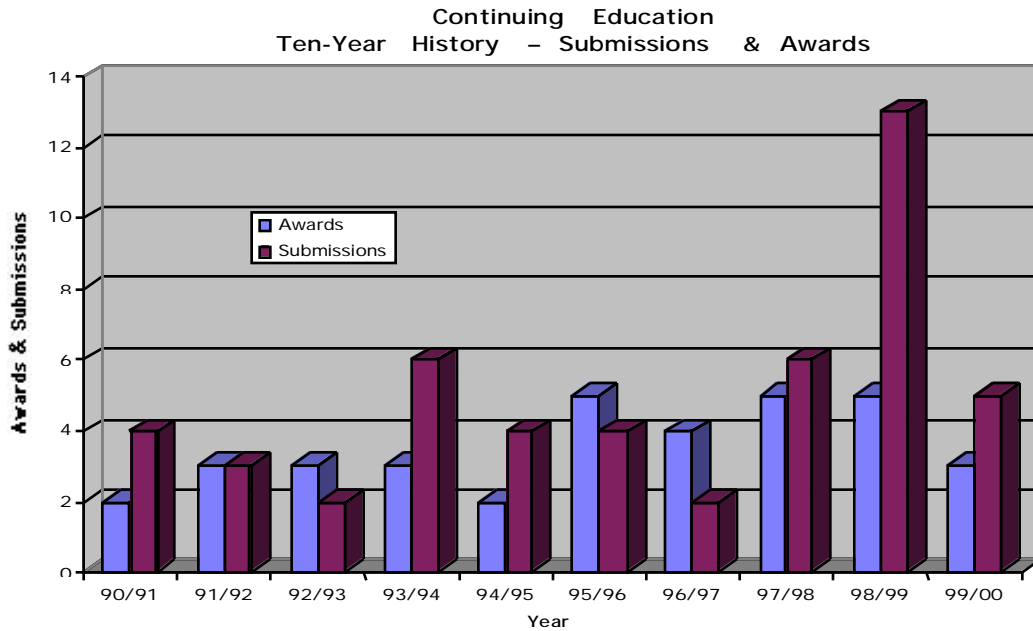

Continuing Education

Fiscal Year 1999-2000

SUBMISSIONS: 5 AWARDS: 3

AWARD DOLLARS: \$68,419

Continuing Education doubled the number of submissions in last fiscal year, but experienced a decrease in submission activity by 62% in FY 1999-2000. The higher level of funding is maintained by receipt of an award from the Toledo Chamber of Commerce.

Education and Human Development

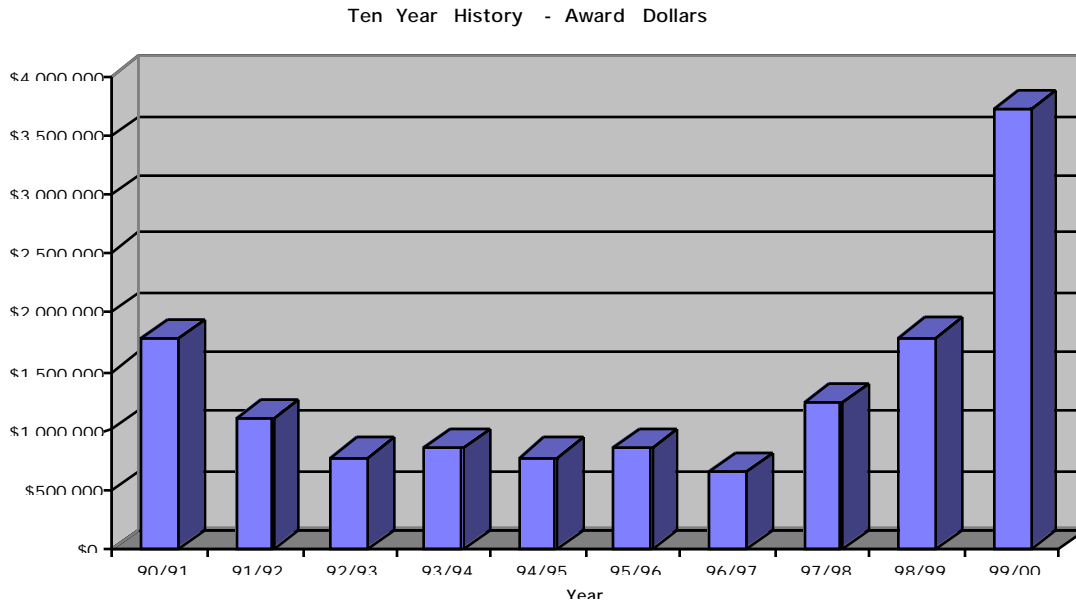

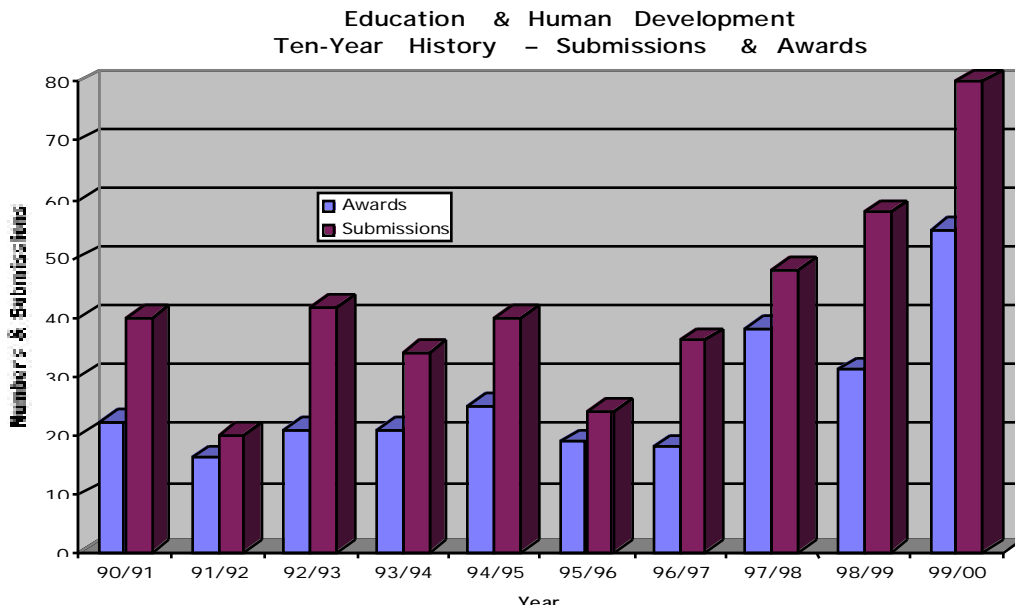

Fiscal Year 1999-2000

SUBMISSIONS: 80

AWARDS: 55

AWARD DOLLARS: \$3,709,769

The past three years have seen an overall increase in awards, submissions and award dollars within the College of Education and Human Development. The number of awards increased in FY 1999-2000 by 77%, while submissions increased by 36%. The award dollars also increased in FY 1999-2000 due to the addition of the Department of Business Education to the Division of Teaching and Learning. High levels of funding for the College have been obtained notably through the Division of Intervention Services (DIS), Division of Teaching and Learning (EDTL), Educational Foundations and Inquiry (EDFI) and the School of Family and Consumer Sciences (FCS).

Firelands

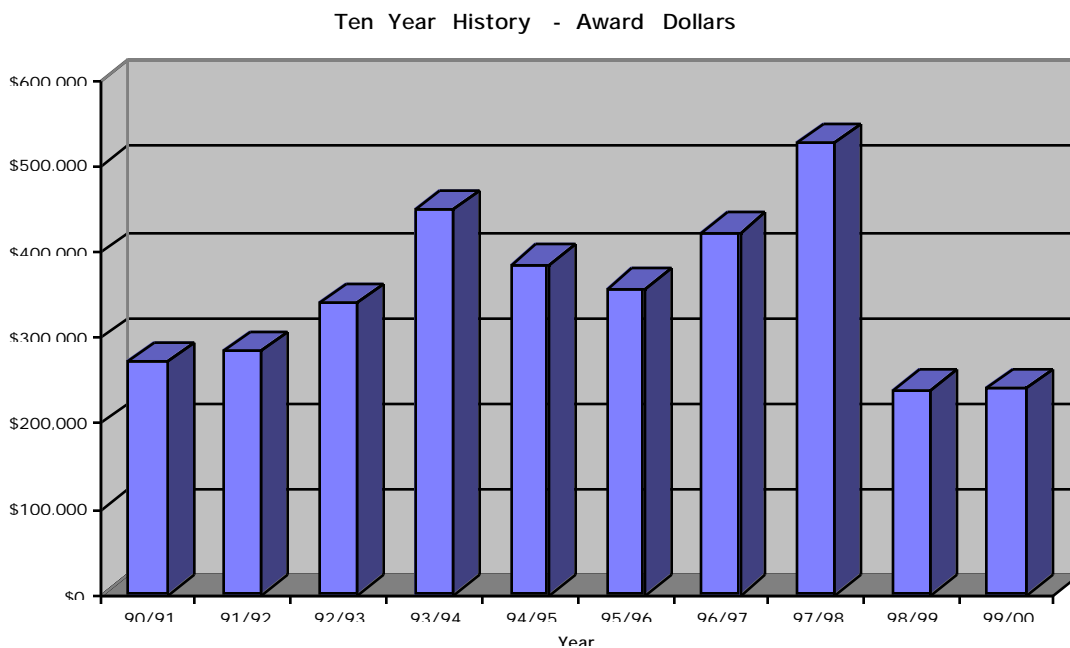

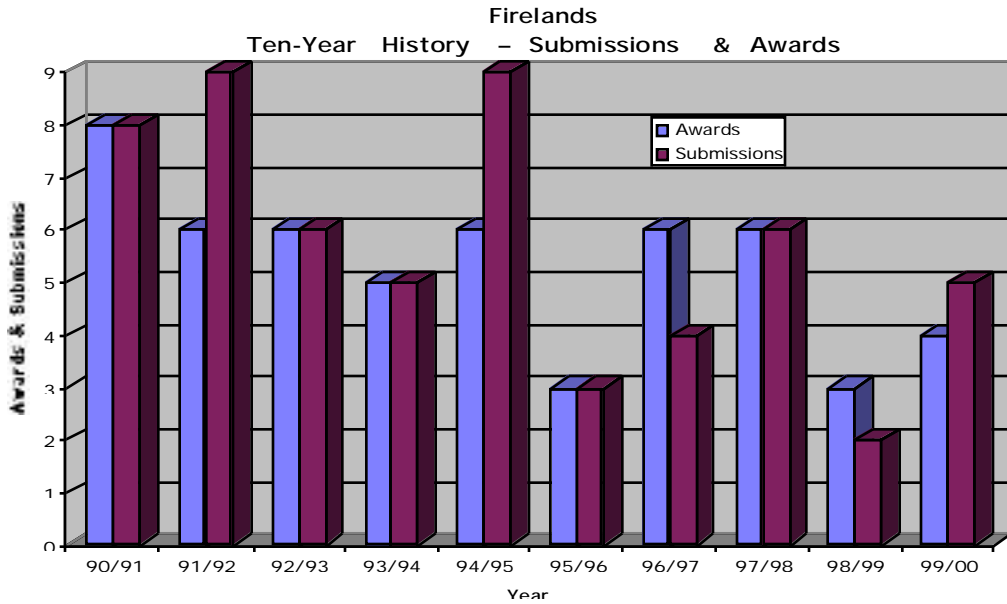

Fiscal Year 1999-2000

SUBMISSIONS: 5

AWARDS: 4

AWARD DOLLARS: \$241,794

Both the numbers of submissions and awards increased slightly for the Firelands College during the past fiscal year. The majority of the award dollars for FY 1999-2000 is due to a sizeable award through the Private Industry Council for job training and an award from the Ohio Board of Regents for delivery of a non-credit training program.

Graduate College

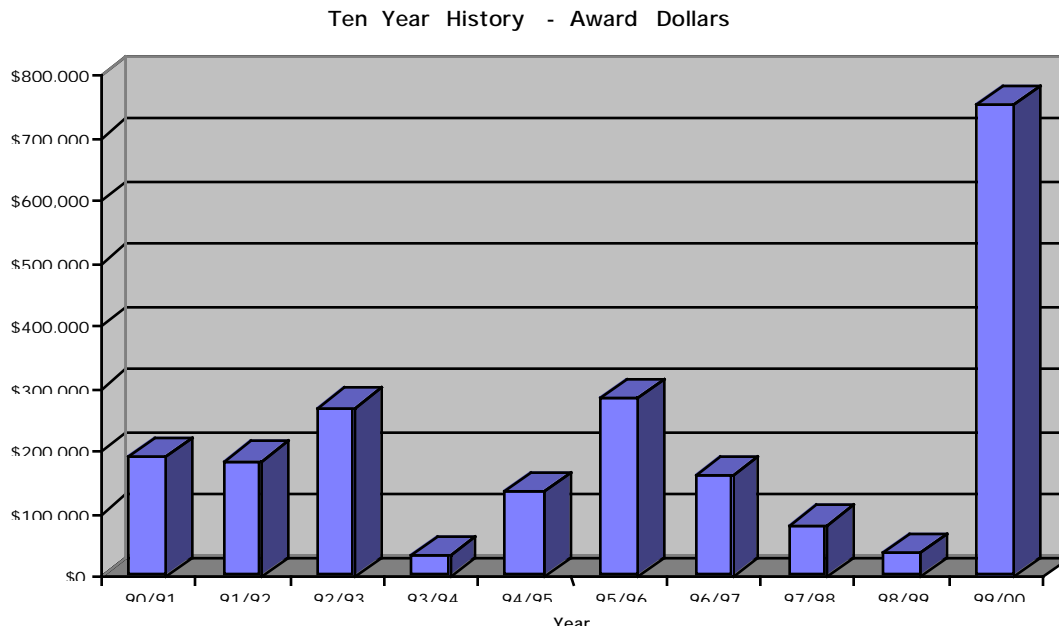

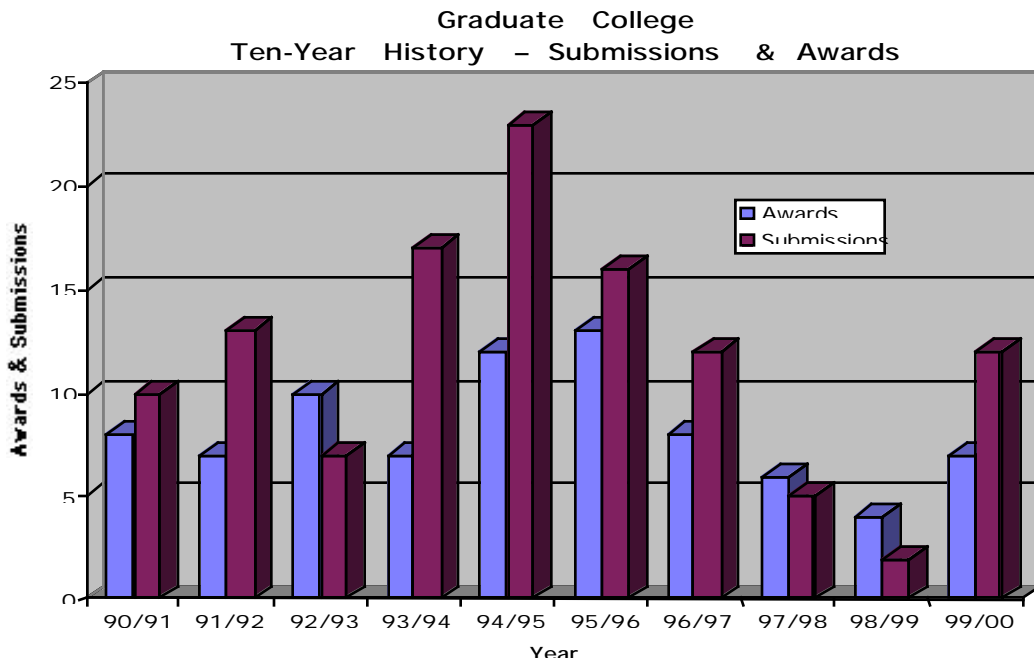

Fiscal Year 1999-2000

SUBMISSIONS: 12

AWARDS: 7

AWARD DOLLARS: \$752,800

Awards and submissions have increased significantly in the Graduate College over the last year. The Graduate College has oversight of several new research Centers of Excellence which are responsible for much of the submission activity. The influx of Research Challenge Fund dollars to the Graduate College accounts for 86% of the award funding while awards to the Center for Policy Analysis and Public Service account for 11.3%.

Health and Human Services

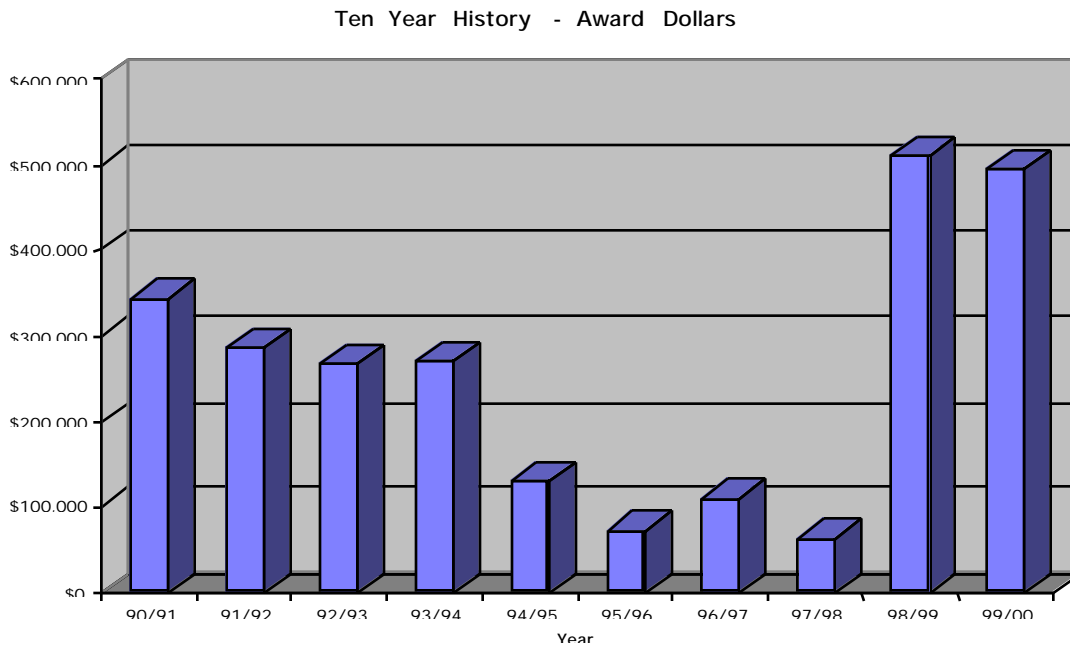

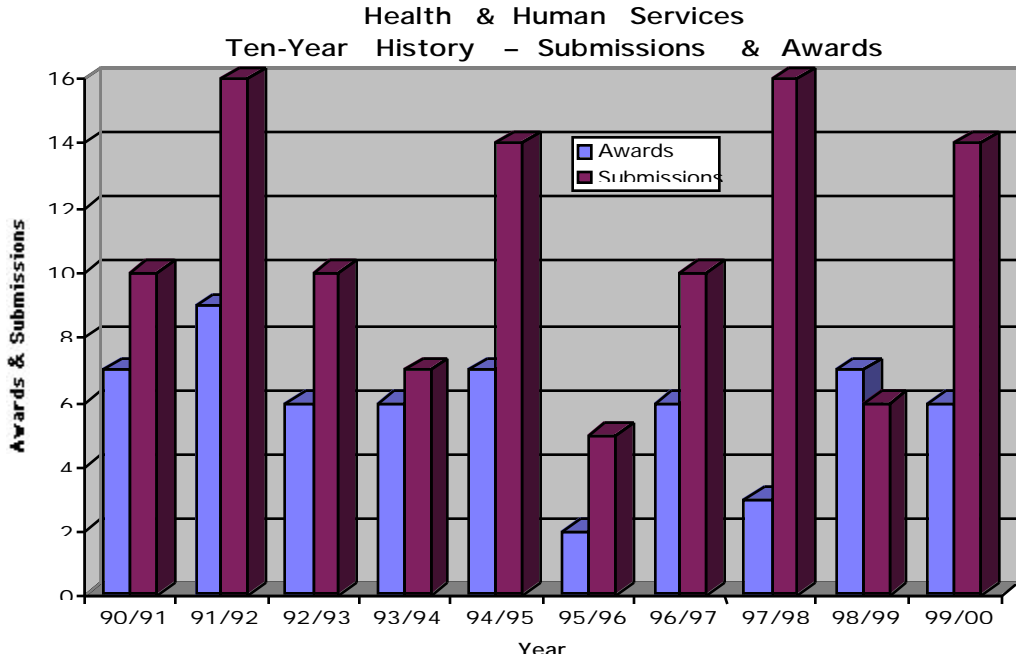

Fiscal Year 1999-2000

SUBMISSIONS: 14

AWARDS: 6

AWARD DOLLARS: \$495,650

The number of submissions more than doubled in FY 1999-2000 and the award amount stayed relatively constant. The college maintains a large grant from the National Institute of Health that accounts for 61% of the funding. Funding has also been received from the Ohio Department of Health, the Office of Criminal Justice Services, and the Ohio EPA.

Libraries and Learning Resources

Fiscal Year 1999-2000

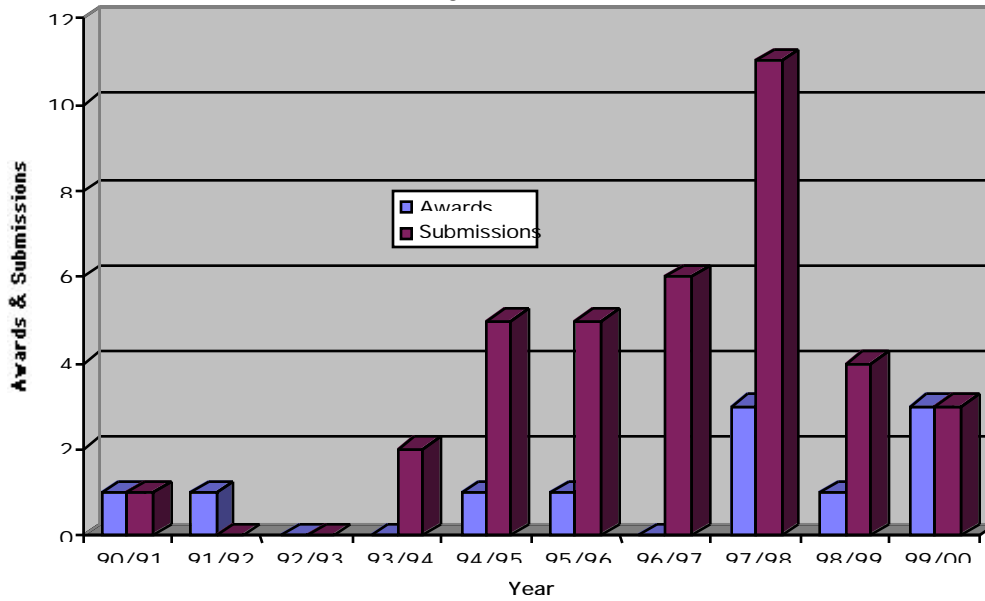

SUBMISSIONS: 3

AWARDS: 3

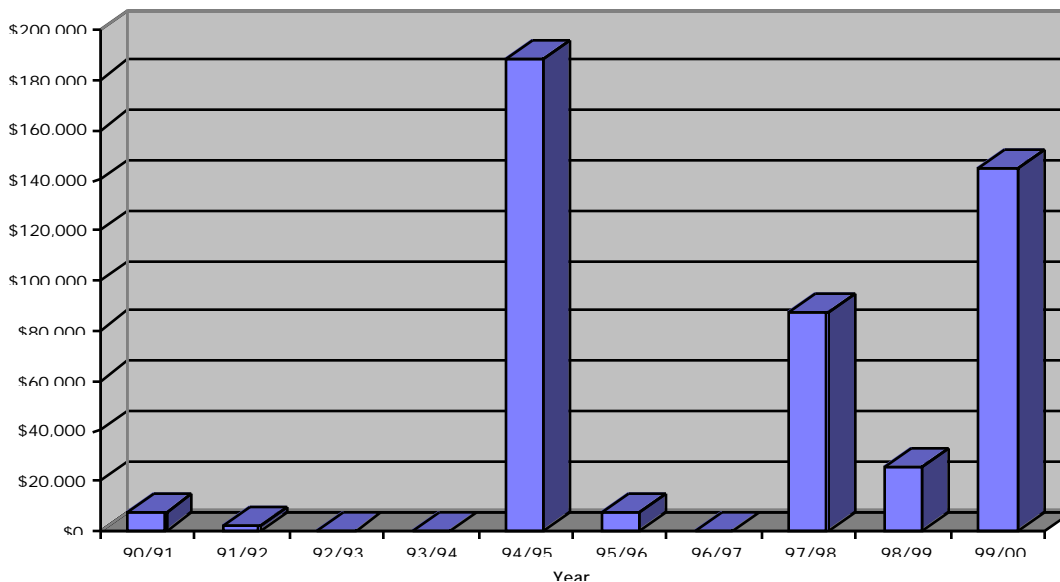

AWARD DOLLARS: \$144,261

The Libraries and Learning Resources (LLR) received a grant from the Ohio Department of Development for maintaining the Ohio Government Contract Assistance Center at BGSU. A study of the Great Lakes Vessels, 1815-1980, was funded by the Ohio Department of Natural Resources. These two grants in particular helped the LLR to achieve funding at approximately six times the 1998-1999 level.
