

# GCAT Computer Training for Local Agencies 2019

## AGENDA

- 9:00 am Introduction & Overview  
Background Information on Ohio  
Crash Data  
Introduction to the GCAT Tool
- 10:15 am *Break*
- 10:30 am Exercises in GCAT  
Introduction to the CAM Tool  
Exercises in the CAM Tool  
Evaluation & Certificates
- 12:15 pm Adjourn

*Total contact hours of training = 3.0 (with  
break times subtracted).*

**Description** – ODOT's **GIS Crash Analysis Tool (GCAT)** is an easy-to-use tool that provides a convenient way for qualified agencies to search statewide crash data. The training is portioned into two categories:

1. **GCAT** – Search for crash data
2. **CAM Tool** – Analyze the crash data received from GCAT

The tool is a web application and can be accessed from any computer online through the ODOT website. This workshop will show how to search for crash data all the way from a statewide perspective down to a particular road or intersection. Each session will be held in a computer training room to allow for hands-on use of the GCAT & CAM Tool software.

**Who Should Attend?** – **GCAT access** is available to following agencies: county, city, village, township, MPOs, ODOT, law enforcement and safety study consultants.

**Instructor** – The primary instructor will be Michael McNeill with ODOT's Safety Program.

**Registration Information** – This course offering is limited to employees of the agencies listed above.

Registrations are processed in the order they are submitted online, while seats are still available. There is **no fee** to attend; however, participants must pre-register. Any registrant requiring a reasonable accommodation during training (i.e., mobility or access) should contact Ohio LTAP prior to the course date so the appropriate arrangements can be made.

Please visit <https://ltap.enrollware.com/schedule> to access the online registration system. Select the course name from the Schedule page, and then scroll down to click on the **session date/location highlighted in green font** to proceed.
