This past month the team had a number of calls with the vendor to discuss some outstanding questions. During this time the team has worked diligently this past month to review and clean up the existing Resource25 database. Once this cleanup is finished, CollegeNet will be provided a copy of our database in order to build out a test environment. The team continues to finish the database cleanup and the project is trending green.

### Past Month’s Key Accomplishments
- Database Review Completed
- Database Cleanup started
- ITS Security Review started
- Vendor training scheduled
- Preliminary SSO work started

### Upcoming Milestones
- Database cleanup completed
- Test environment created
