R03 Funding Available for Research and Methods in Health Statistics

The National Center for Health Statistics invites research grant applications for projects involving the development and testing of statistical and survey methodology relevant to the conduct, analysis and reporting of health surveys and vital records. Existing NCHS data sets alone or in conjunction with other data sets may be used to develop and test new survey methodology, statistical analytical approaches or methods of displaying data. Additionally, research using recently released NCHS data sets to examine health outcomes and related factors is eligible for support. Closing date, **October 7, 2015**.
