

GENERAL LIBRARY POLICIES GUIDE

- Tools for users to freely access information.

The following policies support these commitments, and failure to observe the policies may result in being asked to leave the library or being referred to campus security.

Viewing of Controversial & Sensitive Material

University Libraries resist censorship of information and strongly support the principle of intellectual freedom, and thus support an individual's right to view controversial and sensitive material in the library. However, viewing sexually explicit or violent images or videos at a public computer workstation can be offensive and even threatening to other library users and employees. If UL staff members receive complaints about material that a reasonable person would consider objectionable, the library user viewing the material will be asked to stop or move to a more private location.
