Rationalize/Review General Education Offerings
AROC General Education Subcommittee
Educational Platform

Sub-committee Members

- Sue Houston, Provost Office – Opportunity Manager
- Joel O’Dorisio, School of Art, Faculty Senate Chair-Elect
- Michael Mastalski, Graduate Student, Higher Education and Student Affairs
- Donna Nelson-Beene, Provost Office – Director of BG-Perspective

Goals (Opportunity Assessment Report - December, 2013)

- Review general education offerings with consistently low enrollment to ensure course offerings are focused on student interests and define clear pathways for students to complete a degree in a timely way
- Institute a minimum enrollment policy of 20-25 students for general education lecture courses

Strategies

1. Administer general education, BG Perspective (BG-P), as a program and foundation for all students rather than a large collection of courses. Balance course offerings to provide appropriate pathways for students to progress in their programs without an overwhelming number of choices.
2. Implement changes to the BG-Perspective Program that were approved in 2013. These changes include
   a. alignment of courses with new BG-P Learning Outcomes that are aligned with university learning outcomes
   b. incorporation of assessment plans to assess student learning in the BG-P program
   c. revise academic programs to meet the revised BG-P Program and general education OBOR Guidelines – students complete 36-40 credit hours in the approved domains
   d. re-approve all general education courses
   e. follow-through on regional accreditation (Higher Learning Commission) expectations of assessment and evaluation of the general education program on an ongoing basis
3. Consider student success, resources, enrollment and balance as the changes to the BG-P Program (#2) are implemented. Use analysis of historically under-enrolled courses and courses in which students have very low success rates to inform re-approval of courses in the BG-P Program. Develop practices and processes to monitor under-enrolled courses in an ongoing manner.
**Current Progress:**

1. **BG-P Committee** (broad representation as outlined in the Academic Charter) continues their work in implementing the new BG-P Program.
   a. Learning outcomes, criteria and expectations for new course approval have been approved through UG Council and has been communicated through a variety of meetings such as Dean’s Council, Chairs & Directors, college councils, open forums and the BG-P website
   b. An online system for BG-P course approval (OnBase) has been developed and implemented. Website with directions and resources is active.
   c. Review and approval of new courses has begun
   d. Donna Nelson-Beene (BG-P Director) and Julie Matuga (Director of Assessment) are meeting with programs, departments and other groups of faculty to provide professional development and answer questions.
   e. An initial inventory of courses that programs plan to submit for approval is being collected.
   f. Status Report for Spring 2014 is attached (Appendix A New BGP Program Status Update April 2014)

2. Timeline for completion of course re-approval and program requirement updates developed. Full implantation of the BG-P Program will occur by Fall 2015. Timeline for approval of individual BG-P courses is December 31, 2014 (Appendix B – Timeline BGP Implementation).

3. **AROC Educational Platform** – General Education Subcommittee members have been invited to BG-P meetings and have been given access to the online review process and BG-P discussions to become familiar with the criteria and process for re-approving BG-P courses.

4. Initial analysis of current BGP course inventory (Appendix C – Coded 2013-2014 BGP Course List)

**Next Steps**

1. BG-P committee, BG-P Director, and the Director of Assessment will continue to apply the approved criteria and recommend courses for re-approval/ approval based on these merits. Similar to other course and curriculum decisions, recommendations will be forwarded to the Provost’s Office for final approval. The Provost will consider resources, historical enrollment, and the overall balance and number of course offerings in giving final approval of the course for the BG-P Program.

2. **AROC Educational Platform** and the General Education Subcommittee
   a. Analyze data regarding historically under-enrolled BG-P courses and courses for which students have very low rates of success or difficulty in applying towards their degree pathways.
b. Recommend practices and processes to monitor and limit under-enrolled BG-P courses.

Re: Update: Update Regarding the Implementation of the New BG Perspective Program

Brief background regarding the creation of the new BG Perspective Program to be in place for Fall 2015

Following Undergraduate Council’s passage of a curriculum proposal designed to reshape the BG Perspective Program to become more compliant with OBOR requirements (Spring 2012), the BGP Committee began work to rethink BGP domain categories, create new learning outcomes, design a plan for approval of all BGP courses for the new BGP Program, and create a mechanism for continuous assessment of BGP courses. The committee’s recommendations for changes to BGP’s domains and a set of new BGP outcomes were circulated and passed during the spring semester of 2013.

During the summer and fall semester of 2013, the BGP Committee designed forms and other materials to be used in the submission and review of course proposals for the new BGP Program, worked with ITS to create a site in OnBase for the online submission and review of the course proposals, tested the online site until technological difficulties had been eliminated, piloted the review of course proposals in a development site that ITS created for this purpose, created a “new program” link on the BGP Program website, and determined a timeline for the implementation of the new program.

Status Report for Spring 2014

BGP course proposals submitted thus far. During the current spring semester, the BGP Committee has worked to calibrate our evaluation standards for course proposals, using the rubrics the committee designed for the evaluation of each BGP domain, and has evaluated several course proposals that have been submitted thus far. At this point, four course proposals have been submitted via the online site: MUCT 2360 and BIOL 1040 have been reviewed and approved by the committee; a course proposal for ETHN 1100 has been reviewed, with the committee determining that a revision of the proposal will be necessary; and a course proposal for PHIL 1010 was recently received but it has not yet been reviewed by the committee.

Getting the word out. Outside of committee meetings, much energy has been devoted to ensuring that members of the university community are aware of the forthcoming changes to the BGP Program and that they are well poised to write and submit BGP course proposals. In an email message to faculty and staff on Feb. 17, Sue Houston provided information about the timeline for implementation of the new BGP
Program, directed people to BGP’s website which contains information regarding the new program, announced that the BGP Committee was ready to begin accepting online course proposals, announced two open sessions that Julie Matuga and I were offering for interested faculty in February, and noted that Julie and I welcomed invitations to meet individually with faculty or faculty groups to discuss the new program and the course proposal process. Some of the venues in which information about the new BGP Program and BGP course proposal submission process subsequently were discussed follow:

- Julie and I offered open sessions on Feb. 24 and 25. The sessions were attended by total of 14 faculty and administrators who are writing course proposals for their units.
- Julie and I had traveled to Firelands on Feb. 4 to discuss the new program and proposal submission process with faculty and administrators—and returned to Firelands on March 27.
- Eileen Underwood and I attended CAA on March 5 to provide an update regarding the new program and the course submission process.
- The BG News Interviewed Julie Matuga and me, separately, about the new program, 3/12/14.
- I met with the New Faculty Learning Community on 3/27/14 to discuss the BGP Program and explain the course submission process.

**Meetings with departments.** Additionally, Julie Matuga and I have attended numerous department meetings, sometimes together and sometimes separately, to discuss the information. At all meetings, I have distributed and discussed a packet of documents which includes information about the new program’s structure, the new BGP learning outcomes, the BGP course proposal form, directions for submitting the form, and the timeline for implementation. Julie has focused upon what should be included in the assessment section of the course proposal forms, explaining the purpose of BGP outcomes assessment and illustrating how to streamline assessment plans.

Following the departmental meetings, Julie and I frequently are sent drafts or partial drafts of course proposals or BGP assessment plans for our input, contacted with further questions, and/or invited back for additional meetings.

For the past couple of months, I have maintained a log of my visits to departments to discuss the new BGP Program. The log, which includes the courses that the units have indicated they will submit for review, is provided below. Please note that the question marks that appear in the log have been provided by the departmental representatives themselves when they have not yet fully decided upon the courses they will submit.

Reduction of courses in the BGP Program

The new BGP Program will offer significantly fewer courses than are in the current program, which offers 303 courses. By virtue of implementing the new program, the number of BGP courses will automatically be lessened. A number of courses, it is assumed, will not be resubmitted for approval since they have not been taught in recent years. The BGP Committee also is strongly discouraging the submission of 3000-level and 4000-level courses, which typically are not appropriate for general education. In all likelihood, some of the courses in the Expanded Perspectives Category, which is being eliminated, will not be submitted in new domains. And I have been informed by GREAL that the department does not intend to submit their 1010 and 1020-level foreign languages courses—which are being removed from the Humanities and the Arts domain—for consideration in the International Perspective domain. Finally, as Julie Matuga and I meet with departments, we have been suggesting that they carefully consider which courses they would like included in the BGP Program and to prioritize accordingly.

To get an overall sense of how the numbers of courses in the BGP Program currently are configured within domains, and for helping us reflect upon how the numbers of courses might be configured in the new program, the BGP graduate assistant and I have created a color-coded chart of the numbers of current BGP course categories, noting the domains the courses are currently in. The color coded BGP course list and the accompanying chart have been attached to provide two different perspectives for consideration of the same content.

Conclusion

In short, it is my sense that the university community has been well informed regarding the new BGP Program and that departments are working on, or at least considering, necessary preparations.

Please be sure to let me know if you have questions about any of the information provided in this document.

Red text = Dates established by Registration & Records  
Blue text = BGP Office information  
NOTE:  
Course proposals will be evaluated on a first-come, first-served basis. Early submission is strongly recommended for greater likelihood that departments will meet the Catalog deadline for the semester of their choice. As departments plan their course submission timeline, they should keep in mind that the BGP Committee may request the revision of a proposal. Additionally, it should be noted that BGP course approval is not guaranteed.
The BG Perspective: 21st Century Liberal Studies general education program serves as one of the key elements in the distinctive BGSU undergraduate experience. BG Perspective – along with specialized major programs, co-curricular activities, and residential learning communities – all focus on helping students achieve BGSU’s nationally-recognized University Learning Outcomes (ULOs). The University Learning Outcomes represent a collective set of intellectual skills and values that each BGSU student, regardless of background or major, will have achieved upon graduation. The ULOs are organized into four broad categories: intellectual and practical skills; general and specialized knowledge; personal and social responsibility; and integration, application, and reflection.

One of the primary goals of the BG Perspective general education program is to provide an integrated curricular framework through which students’ progress toward achieving important academic skills such as intellectual inquiry, critical thinking about values, creative problem solving, written and oral communication, and social engagement through participation and leadership.

As one avenue toward acquiring these fundamental skills, Bowling Green State University undergraduate students must complete at least ten approved courses drawn from the BG Perspective curriculum, distributed as follows:

- **Natural Sciences**
  - Need at least two courses
  - ASTR 1940Q Inquiry in Astronomy
  - 2120 The Solar System OTM
  - 2050 Life in the Universe
  - 2070 Understanding the Cosmos
  - BIOL 1010 Environment of Life OTM
