

## **Instructions**

Speakers are installed in room but there is NO AUDIO. (This is a temporary setup)

### To use a Laptop

- 1) Attach the VGA cable hanging from the ceiling to your laptop
- 2) Turn on the Video projector by pressing the red Power button on the remote. (Must point remote at Projector)
- 3) Press the "RGB" button until RGB1 appears on the screen
- 4) Press the necessary Function keys on your laptop to "mirror" screens if it does not do it automatically
- 5) To turn off the Video Projector, Press the red Power button once, it will ask if you want to Shut down, Press the Power button again to say OK
