

# Introduction to MyBGSU

Deb Wells  
Project Manager

Dong Chen  
Portal Architect

I.T.S / Web Development  
Office of the Chief Information Officer  
Bowling Green State University

# What is MyBGSU?

- Learning community for faculty, staff, students, and alumni
- A gateway to many different pieces of content that we use on a daily basis
- A personalized view of resources and information you need all in one place
- Integrated marketing through careful attention to messages and their audiences
- Secure Intranet – Enterprise portal environment that accessible by authorized audiences only

The background of the slide features a light blue gradient with a faint, semi-transparent image of classical architectural columns on the left side. The columns are white with detailed capitals and are set against a darker blue background. The entire slide is framed by a thin brown border.

# What is a Portal?

- A portal is a personalized Web site where you can access your information and use tools customized to you, all with a single sign-on. Examples of popular portals include [My Yahoo](#), [My MSN](#)
- A rich environment for creating a portal Web interface, publishing and managing information, accessing dynamic data, and personalization

# MyBGSU vs. Blackboard

- MyBGSU – a seamless, integrated, intuitive information environment which include:
  - A flexible, robust system to accessing BGSU information
  - Provides a personalized web pages where you can access and customize
  - Establish Single Sign-on for all applications
  - Integrated communication and marketing
  - Provides a standard for distributed application development
- Blackboard – online course management, support flexible teaching and learning in face-to-face and distance courses
