

How do you refresh your screen display when using the Rhythmyx Content Management System (CMS), version 5.6?

Note: Since CMS 5.6 is a Java-based environment, clicking on the refresh button on your browser will reload the Java Runtime Environment. That should only be done as a last resort.

<p>Button on the Content Explorer menu bar</p> <p>Click the refresh button on the right side of the Content Explorer menu bar.</p>	
<p>On the Content Explorer menu bar's View Menu</p> <p>Click View on the Content Explorer's menu bar to display its drop-down menu and choose 'Refresh'.</p>	
<p>On Menus for nodes on the Navigation Tree</p> <p>Right click (PC) or control click (Mac) on any node on the Navigation Tree to display its menu and choose 'Refresh'.</p>	
<p>Short-cut keyboard command</p> <p>Use a Control/R (PC) or (Mac) to refresh your screen.</p>
