

Connecting your Windows Mobile 6 Standard Smartphone to BGSU's Exchange Server

1. Launch ActiveSync
2. Select Menu
3. Add Server Source and type mail.bgsu.edu as the server address. Make sure the SSL option is checked.
4. Select Next and enter your username and password, and use bgsu.edu as the domain.
5. Select next and then select the items you wish to sync and select Finish.

ActiveSync should then try to connect. You will need to accept the policy by selecting "Ok".
