

Several pieces of software are available for download inside of MyBGSU. Simply follow these steps to download which ever software you wish to download.

Log into the MyBGSU Portal, and locate the “Administrative” Tab near the top of the page. It should appear next to “Welcome” and below the main MyBGSU logo. Click on the Administrative Tab.

On the next page, locate a link entitled “Services” located directly below the Administrative tab you just clicked.

Click the Services link.

On the right side of the page, a list of links entitled “BGSU Software Available to Download” will let you choose which piece of software you want to download.

If you wanted to download Virus Scan, you would simply need to click “McAfee Anti-Malware Security for MAC.”
