

AWARDS IN SUPPORT OF UNDERGRADUATE RESEARCH AND SCHOLARSHIP

2011 Fall and Spring Grant Application Guidelines

*** *Please note:* Priority consideration will be given to applications received on or before the target submission date noted on the website and to first time applicants. No applications will be considered after the final deadline. ***

The Program:

- ✧ The CURS Fall and Spring Grant program is focused on developing individual student/faculty mentor relationships and fostering learning through the processes of research and scholarly work.
- ✧ Students will engage in research/scholarship projects for 10 weeks during the fall or spring semester.
- ✧ Each student participant must work with a faculty mentor who is willing to supervise the project. Projects must be initiated and developed by the student applicant(s) under the supervision guidance of their faculty mentor.

The Student Receives:

- ✧ Up to \$500 to offset the costs associated with project supplies.

I. Overview

The Center for Undergraduate Research and Scholarship (CURS) announces the availability of funds to assist undergraduate students in conducting research and scholarly work during the fall or spring semester under supervision of a faculty mentor. Students may apply individually or as a group. Awards of up to \$500 are available with typical awards in the range. In special cases, with appropriate justification, a group project may request more than \$500, but in no case will more than \$750 be provided from CURS for a single project. It is anticipated that 15 awards will be available each fall and spring semester. Students may receive only one Fall or Spring Grant award during any given academic year, but are welcome to apply for other CURS programs (Travel Grant, Summer Grant) separately. The awards are funded by the Office of the Provost and disbursed through the Center for Undergraduate Research and Scholarship.

II. Eligibility

This award is available to undergraduate students from all disciplines that have a cumulative GPA of at least 2.5 and are enrolled full-time during the semester in which funds are requested. Matching funds from departments or colleges are not required but such support will be viewed as a strong endorsement of the proposal.

The faculty mentor must be a full-time, tenured faculty member, or in a tenure-track position. To seek an exception to this policy, students must include a rationale for consideration at the time of their request.

The faculty mentor's department must agree to administer supply funds. Whenever possible, the department should coordinate purchases and order materials to maximize university discount programs and to avoid sales tax as appropriate. All funds must be expended by the end of the semester during which funds are awarded.

III. Application

The application consists of an Application/Endorsement form, a Project Narrative (Proposal) describing the research/scholarly project, and a letter of support from the faculty member who will serve as the student's mentor. Details of each are outlined below. Applications for projects that involve human subjects, live vertebrate animals, recombinant DNA, or radioactive materials must also include appropriate regulatory committee forms before funds will be released.

For full consideration, completed applications must be received in the Center for Undergraduate Research and Scholarship in 209E Harshman by the target submission date. Proposals received after the target submission date but before the final deadline will be considered for that semester if funding is still available.

A. Endorsement Sheet

The endorsement sheet serves to collect routine information about the student applicant(s), faculty mentor, and the proposed project. It also serves to alert the student applicant(s) and faculty mentor to potential regulatory considerations that must be met. Finally, it certifies the commitment of the student(s), faculty mentor, and the mentor's academic department to the proposed project. For group projects, one student should be designated as the contact person and others listed as co-researchers. (Please provide contact information for each student).

B. Proposal

Students must submit a written proposal (typically 4-7 pages) that is typed using 12-point, Times New Roman font, and single-spaced with 1-inch margins. The original document and two hard copies of the proposal must be delivered to the Center for Undergraduate Research and Scholarship, located in 209E Harshman.

TIP: Remember, you are asking for money, so make it easy for the reader to understand what you propose to do, why it is important, and how you will successfully complete the project within the requested timeframe and budget. Keep in mind the proposal will be evaluated by a panel of faculty members representing a range of disciplines. As such, you should avoid the use of too much technical jargon specific to your discipline that others will not understand.

Each proposal must consist of the following sections and sub-sections:

1. Cover Page (1 page maximum). Must include:
 - ✧ Project Title.
 - ✧ Name of Student Applicant(s).
 - ✧ Name of Faculty Mentor.

2. Project Narrative (normally 2-3 pages and definitely not more than 5 pages).
Must include:
 - ✧ Introduction statement about the project.
 - ✧ Proposed plan of action to complete the research/scholarly project.
 - ✧ Anticipated results/accomplishments or outcome(s). In this section you should discuss how you will analyze and interpret your results or how you will present and evaluate your scholarly work. Explain how these results will impact your discipline and describe any anticipated follow-up studies.

3. References (normally 1 page):
 - ✧ Provide full citations (including title) of all references cited in the proposal.

4. Figures and Tables (as many pages as needed):
 - ✧ Figures and tables may be presented here separately, or imbedded in the narrative text. All figures must have a caption and all tables must have a heading to explain the information. Be sure to cite your sources in your References.

5. Budget and Justification (1 page maximum):
 - ✧ Provide an itemized and annotated statement of your best estimate of supply costs associated with your project. Supporting documentation is encouraged. You may request up to \$500 from CURS, but it is anticipated that most awards will range between \$250 and \$350. In special cases, with appropriate justification, group projects may request more than \$500, but in no case shall more than \$750 be provided from CURS.
 - ✧ Your budget should accurately reflect the cost of the proposed research/scholarly work. If the budget exceeds the maximum award available from CURS, you must clearly indicate from where the additional funds will come (e.g., from department, faculty mentor's grant, etc).
 - ✧ You must provide a justification for all of the requested items. Funds may be requested for any reasonable research/scholarly related expenses. However, funds requested for travel must be especially well justified.

C. Letter of Support from Faculty Mentor:

The faculty mentor must write a brief letter of support for the proposed project. In this letter, the faculty mentor should provide a critical assessment of the:

1. Scholarly impact of the proposed project;
2. Credentials of the student(s) with regard to successful completion of the proposed project (please cite specific examples of preparation and experiences);
3. Impact of the project on the faculty mentor's larger research activities/scholarly work;
4. Appropriateness and accuracy of the budget.

The faculty mentor should confirm his/her willingness to supervise this project, and provide assurance that expectations for participation are understood, especially in regard to ensuring compliance with university regulations and expectations for completing assignments (i.e., that student papers and PowerPoint presentations are accurate and submitted on time). Finally, should the project budget exceed the maximum amount available through this program, the mentor should confirm that the additional necessary funds exist to cover any additional costs.

IV. Evaluation Criteria for Proposals

Proposals will be evaluated by faculty members representing a range of academic disciplines who have actively involved undergraduates in their own research and scholarly work. The proposals will be judged on the basis of the following four general criteria.

A. Quality of the Proposal

- ☒ Is the proposal well-written? Is the research problem or scholarly project clearly articulated and being facilitated primarily by the student(s)?

B. Potential Impact of the Study

- ☒ What are the anticipated benefits that are expected for the participating student(s), the discipline, and the faculty mentor's research/scholarly activities?

C. Potential for Success

- ☒ Do student applicants have adequate training and experience to successfully complete the project in the stated time frame?

D. Budget

- ☒ Is the budget appropriate/sufficient to complete the proposed work and if the budget is more than CURS can support, have other sources been identified to cover the remaining expenses?

V. Award Notification

It is anticipated that a funding decision will be made within two weeks of the application deadline, and the student(s) and faculty mentor will be notified **by email**. Students will be sent a Grant Recipient Contract that must be completed and returned, indicating acceptance of the terms and responsibilities of the grant, before any funds will be transferred.

VI. Disbursement of Funds

Successful applicants will receive instructions on how monies are to be disbursed. In general, funds will be released to the home department of the faculty mentor who will act as account administrator. Whenever possible, the department should coordinate purchases and order materials to maximize university discount programs and to avoid sales tax as appropriate. Receipts or invoices will be required for reimbursement, and students should speak with the faculty mentor or designee for exact procedures and requirements. All funds must be expended by the end of the semester in which funding is awarded.

Please note that in accordance with university purchasing guidelines, any tangible items purchased with CURS funds (such as computers, cameras, digital recorders, etc.) are considered university property and are expected to be returned to CURS upon completion of the project in order to benefit future undergraduate researchers. Exceptions must be approved by CURS in consultation with the department prior to purchase.

VII. Project Duration

It is anticipated that the project will span ten weeks (depending on timing of notifications) and be completed by the end of the semester in which funding is requested/received. During this period, the student and faculty mentor should maintain regular meetings/communication. A final report (two assignments, as outlined below) must be submitted to the Center for Undergraduate Research and Scholarship by the last day of classes for the semester in which funding is awarded.

VIII. Reporting Requirements (Assignments)

Students who receive an award are required to complete two written assignments (a report/reflection paper and a PowerPoint document) upon completion of their project, and must present their findings at the OPSR Fall Research and Activity Conference.

A. Written Assignments:

- 1) A brief report/reflective paper (2-3 pages maximum) describing the major objective(s) and the results/outcomes of their completed project, as well as a brief personal reflection about the overall experience. The report should be typed and written in the style appropriate to the students' discipline (APA, MLA, etc.).
- 2) A PowerPoint presentation document (12-15slides) that provides an overview of the project, describing the research questions for the study/nature of the project, the methods used, the research findings and/or results, and implications of the project/conclusions. (Organization of the presentation may vary according to the students' discipline). PowerPoint documents will be archived and displayed on the Center of Undergraduate Research and Scholarship website.
- 3) Financial disclosure statement (email submitted with assignments) confirming how the grant funds were utilized and whether any tangible purchases were made with grant funds. (Certain purchases become property of the University and must be returned at the end of the project (refer to *Disbursement of Funds*, section, above). Failure to properly document or return requested property could result in a referral for disciplinary action.

Written assignments are due (to be submitted electronically) to the Center of Undergraduate Research on the last day of classes during the semester in which funding is provided. (Further instructions will be provided during Individual Meetings at the mid-point of the project). Failure to submit completed reports in a timely fashion will jeopardize future awards involving the faculty mentor and his/her department. In addition, the student(s) may be required to reimburse the University up to the full amount of the award. If a project cannot be reasonably completed by the end of the semester in which funding is awarded, an extension may be given through the following semester provided a written request is submitted to the Center for Undergraduate Research and Scholarship prior to the completion deadline. Students requesting an extension must provide a brief description of progress to date and indicate the reason(s) the project will not be completed on time. The request for an extension must include the signature of the faculty mentor indicating that the request is reasonable and that he/she agrees to continue overseeing the project through its completion. If an extension is granted, the final report is due no later than the last day of classes for the following academic semester.

B. Participation in Fall Research and Creative Activity Conference (November)

In addition to the final report, students who receive funding through this program are required to communicate their results/outcomes to the campus community through participation in the annual Fall Research and Creative Activity Conference, sponsored by the Office for Sponsored Programs and Research, which is usually held in early November. Students are expected to register for the event and participate by presenting a poster of their research or creative project (may use PowerPoint format previously submitted to the Center). All students receiving CURS grants within the year preceding the conference are required to participate, with the exception of those who have since graduated.

IX. Responsibilities of Faculty Mentors

A. In conjunction with the application, the faculty mentor must certify that the student's proposed project sufficiently represents valid research/scholarly work and that the project will contribute to the educational development the undergraduate applicant(s).

Further, the faculty mentor must insure that the:

1. Student applicant submits a well-written proposal that can be understood by an educated person who is not a specialist in the field. *(Please note, while it is important for mentors to provide feedback and support, the proposal itself (Project Narrative) must be written by the student, in the students' voice);*
2. Application conforms to the format specified in these guidelines;
3. Required information and appropriate protocol forms concerning special circumstances are supplied.

4. The faculty mentor must also certify the accuracy and appropriateness of the budget and must further certify that the student(s) received appropriate training and approval for any work involving human subjects, live vertebrate animals, radioactive materials, and/or recombinant DNA.

The faculty mentor should decline sponsorship of any proposal that falls outside the criteria specified by the Awards in Support of Undergraduate Research/Scholarship Program guidelines.

- B. Once the project is underway the faculty mentor plays a critical role in the learning process by interacting regularly with the student and frequently discussing the students' progress.
- C. Faculty members must work with student and department budget officer(s) to provide appropriate oversight for all project expenditures, ensuring that purchases fall within the expectations outlined in the grant proposal, as well as university policy guidelines.
- D. The faculty mentor must complete the mid-semester progress report form provided by the Center and return it by the specified date. This form allows the Center staff to track students' progress and intervene if necessary.
- E. Finally, upon conclusion of the project, the faculty mentor should review the students' written assignments (Project report/reflection paper, PowerPoint, and financial disclosure statement) and provide feedback to the student prior to being submitted by the student(s). Faculty members should help ensure projects are completed in a timely manner.
