Our Travel Bug

What To Do

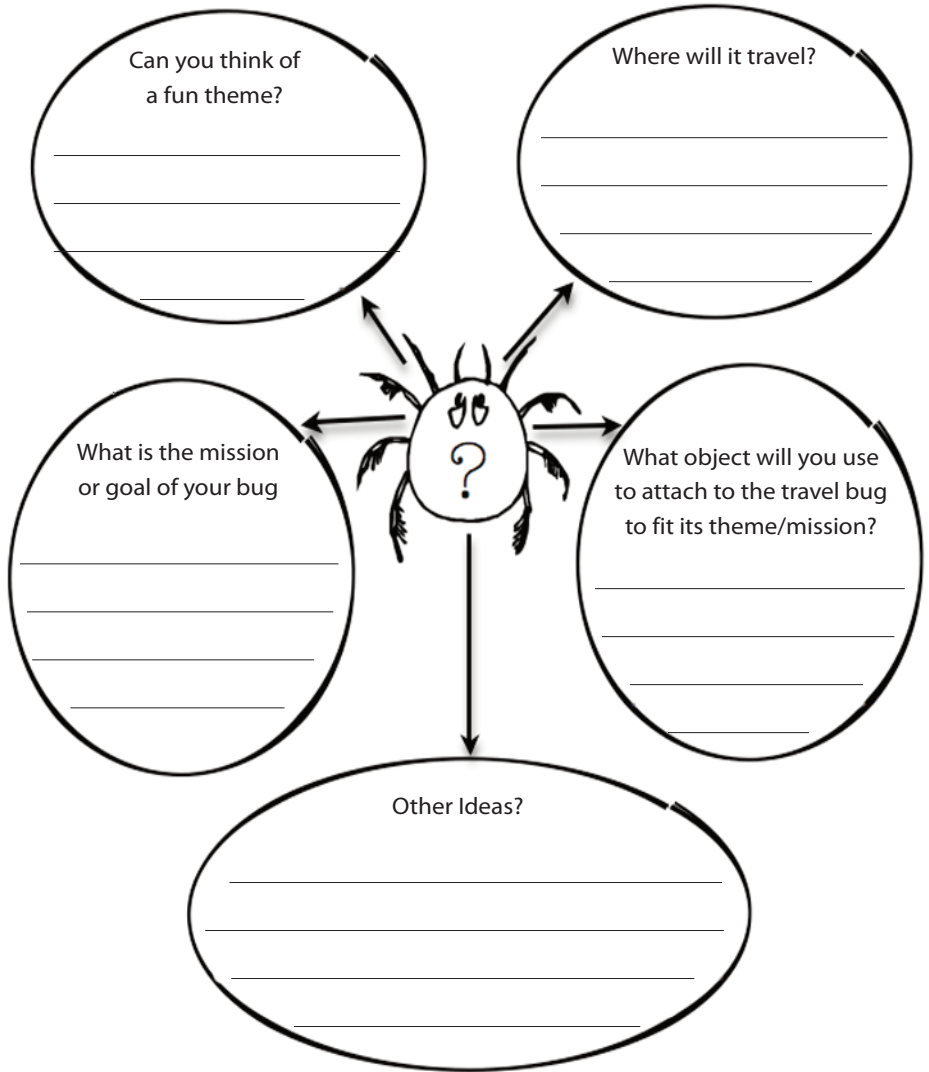

Start a family travel bug! A travel bug is a dog tag that gets sent around the state, country, or even the world through geocaches. It usually has a mission. For example, you might attach a small Alaskan Husky figurine to your travel bug and its mission is to travel to Nome, Alaska where the Iditarod dog sled race is held every year. Geocachers will move it from cache to cache until it hopefully reaches its final destination. You can track the travel bug's progress, mileage, photos, etc. as it makes its long journey! Simply purchase one from the shop at www.geocaching.com or use one you have. Then, visit <http://www.geocaching.com/track/travelbugs.aspx> to learn more about sending your bug! Use the cluster map on the back to help you get started with ideas and have fun!
