Our Travel Bug

What To Do

Start a family travel bug! A travel bug is a dog tag that gets sent around the state, country, or even the world through geocaches. It usually has a mission. For example, you might attach a small Alaskan Husky figurine to your travel bug and its mission is to travel to Nome, Alaska where the Iditarod dog sled race is held every year. Geocachers will move it from cache to cache until it hopefully reaches its final destination. You can track the travel bug’s progress, mileage, photos, etc. as it makes its long journey! Simply purchase one from the shop at www.geocaching.com or use one you have. Then, visit http://www.geocaching.com/track/travelbugs.aspx to learn more about sending your bug! Use the cluster map on the back to help you get started with ideas and have fun!
Start a cluster map to help you brainstorm ideas about your travel bug!

Can you think of a fun theme?

Where will it travel?

What is the mission or goal of your bug?

What object will you use to attach to the travel bug to fit its theme/mission?

Other Ideas?
