Mac OS X Tiger Client Setup Guide

This step-by-step document assumes you have a factory or aftermarket AirPort/Airport Extreme adapter installed in your Apple running Mac OS X. You will also need a valid BGNet account to gain access to the wireless network.

For more information regarding wireless network access, recommendations and locations please visit [www.bgsu.edu/its/network/](http://www.bgsu.edu/its/network/). For assistance with wireless access please contact the TSC at (419) 372-0999.

1. Click the **Apple** menu and select **System Preferences**.
   
   - Under Internetwork & Network, select **Network**.
2

In the Show menu select **Airport**.

► Select **Preferred Network** from the By Default, Join menu.

► Click the **+** button to configure the network settings.

3

► In the Network Name field, enter **bgsu** (lower case) and click OK.

Note: Wireless Security should be set to **None**.
Select **TCP/IP**

► Ensure the Configure IPv4 menu is set to **Use DHCP**.
► Click **Apply Now** and close window.

From the toolbar click the AirPort indicator.

► Ensure **bgsu** is selected ✅.
► Select Open **Internet Connections**.

► If you are within range of BGSU’s wireless network, you should see a signal level indication.
Open a web browser

► You should automatically be directed to BGSU’s Wireless Authentication page.

► Enter your BGNet credentials in the required fields and Click **Log In**. Upon successful login you will be directed to your homepage.

► Also on this page are links to the wireless locations that you can access for both the Bowling Green and Firelands Campus.

► You may see a small pop-up window that allows you to log out when desired.

Enjoy!
