

# NEUROSCIENCE

## BGSU COLLEGE OF ARTS AND SCIENCES

The Bachelor of Science in neuroscience is an interdisciplinary program between the Biological Sciences and Psychology Departments. The J.P. Scott Center for Neuroscience, Mind & Behavior is a University-wide research and teaching center that oversees the neuroscience program. Neuroscience majors study and research the dynamic relationship between the nervous system, mind, and behavior in humans and animals.

### College of Arts and Sciences – Neuroscience

#### Points of Pride

- The J.P. Scott Center for Neuroscience, Mind & Behavior focuses on comparative neuroscience at all levels of analysis. This unique interdisciplinary center brings together faculty, post-doctoral researchers, graduate and undergraduate students for formal lectures and informal discussion of ongoing projects and current neuroscience topics.
- The 9,000-square-foot University Animal Facility has 30 breeding and maintenance rooms that are essential for research and student training.
- Neuroscience research opportunities exist with faculty members in the psychology, biological sciences, communication disorders and philosophy departments.
- The program prides itself on successfully transitioning undergraduate students to graduate programs in neuroscience and medical schools.
- Neuroscience faculty include internationally renowned scientists specializing in cognitive, affective and sensory neuroscience who have a solid record of extramural grant support.
- The BGSU Student Neuroscience Association meets regularly and provides information about research and expanded educational opportunities.
- The program hosts and participates in diverse outreach events including the annual Brain Awareness Week, which celebrates neuroscience advances in research and delivers educational opportunities to the general public.

#### Students may want to consider a minor or second major in the following areas:

- Biology
- Chemistry
- Psychology
- Science

#### What can I do with this major?

Neuroscience graduates pursue careers in the following areas:

- Education
- Medicine
- Medical Research
- Neuroscience
- Pharmaceutical Industry
- Psychology
- Public Health
- Veterinary Medicine

### A Public University for the Public Good

The Neuroscience program at BGSU is dedicated to scientific research and training that contribute to the near and long-term prosperity of society. The program serves the public good by conducting interdisciplinary research that provides society with advances in health and medicine.
