

# The Recycler

December Edition 12.1.22

Make your own wrapping paper or go without. Unfortunately, nearly all the wrapping paper you find in stores is not recyclable because of the shiny coatings, foils and colors on it.

Send digital gift cards. This is one of the best ways to reduce waste and fuel consumption. Digital gift cards can be sent over the internet, allowing the recipient to place orders at online stores.

Shop organic and local this holiday season. Whatever food you might be serving during the celebration, keep it locally grown and organic, and do not purchase meat from industrial farms. It is not only a pleasure for your taste buds, but also a big winner on the eco front.

Are you still using old-fashioned, single-use, alkaline batteries in devices like your TV's remote control? Try rechargeable batteries instead. You'll save money over time and help cut down on the billions of dollars worth of batteries sold each year in the United States.
