Variable Notes

1. A constructed, dichotomous variable indicating whether or not the respondent and their spouse or partner are living together.

2. A1SMARRS is a constructed variable indicating a scale for the level of marital risk created from variables A1SP7 through A1SP9C.

3. A1SSPEMP is a constructed variable indicating a scale for the level that the respondent perceives his/her spouse/partner is sympathetic towards respondent created from variables A1SP11 through A1SP16.

4. A1SSPCRI is a constructed variable indicating a scale for the level that the respondent perceives his/her spouse/partner is critical towards respondent created from variables A1SP17 through A1SP22.

5. Responses in military time.

6. Questions for variables A1PB36A (1 through 9 and _A), A1PB36B (1 through 9 and _B), and A1PB36C (1 through 9 and _C) are asked for each child, 1 through 10. Frequencies are shown for only the first child.

7. A1PBAG1 through A1PBAG10 are constructed variables for each biological child's age, using responses from A1PB3A (1 through 9 and _A), A1PB36B (1 through 9 and _B), and A1PB36C (1 through 9 and _C).

8. Questions for variables A1PB37A (1 through 9 and _A), A1PB37B (1 through 9 and _B), A1PB37C (1 through 9 and _C), and A1PB37D (1 through 9 and _D) are asked for each child, 1 through 10. Frequencies are shown for only the first child.

9. A1PBAO1 through A1PBAO10 are constructed variables for each non-biological child's age.

10. A1SPIFAM is a constructed variable indicating the level of perceived inequality in the family created from variables A1SN6A through A1SN6F.

11. There are no frequencies available for this variable.

12. A1SRSUIO is a constructed variable indicating the level of getting care from non-family or friends (hours per month) created from variables A1SK13E through A1SK13H.

13. In the questionnaire, "No" is identified as "5," however, in the codebook, "No" is coded "2."
A1SKINPO is a constructed variable indicating the level the respondent perceives that extended family is positive towards the respondent created from variables A1SM2 through A1SM5.

A1SKINNE is a constructed variable indicating the level the respondent perceives that extended family is positive towards the respondent.

A1SEMD is a constructed variable indicating a scale for maternal discipline created from variables A1SE14F through A1E14I.

A1SMMOD is a constructed variable indicating a scale for the level the mother acted as a model for generosity to others during the respondent's childhood created from variables A1SE14L and A1SE14M.

A1SEFD is a constructed variable indicating a scale for paternal discipline created from variables A1SE16F through A1SE16I.

A1SEFMOD is a constructed variable indicating a scale for the level the father acted as a model of generosity to others during the respondent's childhood created from variables A1SE16L and A1SE16M.

Variables A1SE17A through A1SE17E measure emotional abuse.

Variables A1SE17F through A1SE17J measure physical abuse.

Variables A1SE17K through A1SE17O measure severe physical abuse.

This project was supported with a grant from the U.S. Department of Health and Human Services, Office of the Assistant Secretary for Planning and Evaluation, grant number 5 UOI AEO00001-04.
