

# Marriage Rate in the U.S., 2008

Krista K. Payne

## Change in Marriage Rate in the U.S., 1970 - 2008

- Since 1970, the marriage rate in the U.S. has been declining. This is estimated as the proportion of marriages per 1,000 unmarried women 15 years and over.
- Last year, 4,554,102 individuals aged 15 and older married.
- In 2008, about 3.5% of unmarried women got married. That is roughly 35 marriages per 1,000 unmarried women.

Marriage Rate in the U.S., 1970 - 2008

Sources: The 1970, 1980, and 1990 data come from the Centers for Disease Control and Prevention/National Center for Health Statistics. The 2000 data come from the National Center for Health Statistics, CDC and the Census Bureau, Census 2000. The 2008 data come from the Census Bureau, American Community Survey, 2008.

## Five States with the Highest and Lowest Marriage Rate, 2008

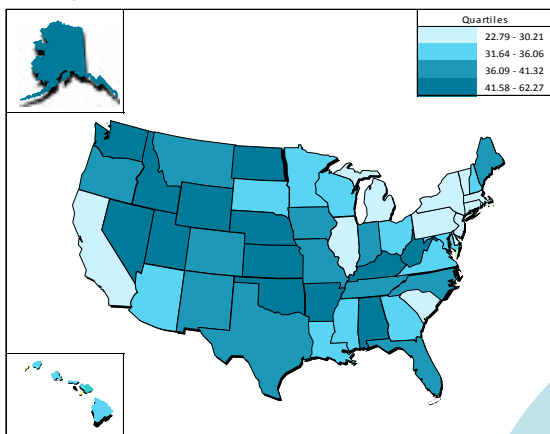

- In Utah, about 62 women per 1,000 unmarried women over the age of 15 got married in 2008. In other words, roughly 6.2% of unmarried women got married in that year.
- In Washington DC, about 23 women per 1,000 unmarried women over the age of 15 got married in 2008. About 2.3% of unmarried women got married in that year.
