Family Profile No. 27, 2022 Marriage to Divorce Ratio in the U.S.: Geographic Variation, 2021

Author: Francesca A. Marino & Gabrielle Juteau

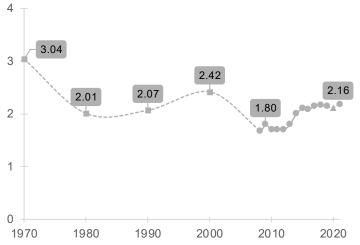

This family profile updates previous profiles on the marriage-to-divorce ratio (<u>Reynolds, 2020</u>; <u>Schweizer, 2019</u>; <u>Schweizer, 2019</u>; <u>2019b</u>; <u>Wu, 2017</u>; <u>Eickmeyer, 2015</u>) and examines state variation in the ratio of marriages to divorces. Using recent American Community Survey (ACS) data, we calculate national and state level marriage-to-divorce ratios by dividing the number of women's marriages by the number of women's divorces for a given population in a given year.

U.S. Marriage-to-Divorce Ratio

- In 2021, there were approximately two marriages per every one divorce in the United States (ratio = 2.16). Specifically, there 2,052,806 marriages and 948,862 divorces.
- The ratio has remained stable since 2014, when there were approximately two marriages for every one divorce (FP-15-19). This indicates that the changes in marriage are occurring at the same pace as changes in divorce.

Five Highest and Lowest Marriage-to-Divorce Ratios, 2021

- All states had a greater number of marriages than divorces. District of Columbia (3.89), Alaska (3.51), and Utah (3.04) had the highest marriage-todivorce ratio in 2021. There were at least 3 marriages per every one divorce in these states.
- The states with the lowest marriage-to-divorce ratios were Idaho (1.53), Vermont (1.54), and West Virginia (1.55). In these states there were 1.5 marriages for every one divorce.

Figure 2. Women's Highest and Lowest Marriage-to-Divorce Ratios, 2021

Rank	State	Ratio
1.	District of Columbia	3.89
2.	Alaska	3.51
3.	Utah	3.04
4.	New Hampshire	2.80
5.	Wisconsin	2.66
	USA	2.16
47.	Louisiana	1.65
48.	Mississippi	1.57
49.	West Virginia	1.55
50.	Vermont	1.54
51.	Idaho	1.53

- Among states in the Northeast, most of the ratios were in the highest quartile, meaning they had some of the largest ratios of marriages-to-divorces in 2021.
- For those in the Western region of the U.S., their ratios most often fell in the lowest quartiles (31% each).
- Among states in the South, most were in the bottom quartile), meaning they had some of the smallest ratios of marriages-todivorces in 2021.
- Midwestern states tended to cluster in the two middle quartiles, with two-fifth of their states in each.
