Notes:

- ^a Data are explicitly noted as being preliminary.
- ^b Reports by counties may be incomplete due to censoring or reporting issues/differences.
- ^c The counts for the counties in ME are based on estimates. The state would not provide county-level marriage data. We contacted the most populated cities in each county and requested the number of marriages (either issued or filed). Based on the proportion of the counties' populations living in the cities we contacted, we estimated the number of marriages occurring in their associated counties.
- ^d Unable to determine if county of residence or occurrence.
- ^e Figures obtained were given for resident males and resident females. We report the number for resident males.
- ^f County of occurrence when available, otherwise county of issuance.

These data are from work supported by the National Institutes of Health under Grant No. 5R03HD078653 to Wendy D. Manning at Bowling Green State University; the National Center for Family & Marriage Research, supported with assistance from Bowling Green State University (from 2007 to 2013 support was also provided by the U.S. Department of Health and Human Services, Office of the Assistant Secretary for Planning and Evaluation); the Center for Family and Demographic Research, Bowling Green State University, which has core funding from the Eunice Kennedy Shriver National Institute of Child Health and Human Development (P2CHD050959).
