Dr. Marie Tisak submitted a grant application to NICHD entitled, “Aggressive and Violent Exposure: Consequences and Moderators for Youth Offenders.”

---

### **Health Behavior in School-Aged Children (HBSC) Data**

This is a school-based study of health-related attitudes and behaviors of young people and is conducted every four years starting in 1985-1986. The study contains variables dealing with many types of drugs such as tobacco, alcohol, marijuana, inhalants, and any other substances. The study examines the first time these substances were used and the frequency of their use. Other topics include eating habits, body image, health problems, family make-up, personal injuries, bullying, fighting, and bringing weapons to school. For more information please visit: <http://www.icpsr.umich.edu/cocoon/SAMHDA/STUDY/04372.xml>

Please RSVP to [mcclaskie.1@osu.edu](mailto:mcclaskie.1@osu.edu) prior to April 12th if you plan to attend. Cumberland E, Exhibit Level of the Hyatt Regency.

---

### **Conference on Persistence in High School and College**

The Future of Children is offering a free conference on how students persist during their high school and college years. The conference will be held on April 30 at Princeton University. This conference will highlight issues of education persistence and degree attainment by reviewing the research on causes and effective initiatives. Interventions designed to help at-risk students overcome barriers will be discussed. Particular focus on practical solutions for issues such as remedial/developmental education, advising, and high school/college bridge programs will be provided. Find more information at their web site:
