### **NIH Public Access Policy**

NIH Public Access Policy requires that all peer-reviewed journal articles funded in part or whole by NIH be submitted to PubMed Central. The CFDR offers a variety of services to help researchers with compliance issues. When your paper is accepted for publication, we can submit the manuscript to PubMed Central for you. Simply forward a copy (including title page) of the final accepted peer-reviewed manuscript along with the journal information to Colleen Scott at [cmbihn@bgsu.edu](mailto:cmbihn@bgsu.edu). Questions? Call 419.372.6045.

### **World Marriage Data 2008 Available at the CFDR**

The World Marriage Data 2008 CD-ROM provides a comparable and up-to-date set of data on the marital status of the population, as well as the number of marriages and divorces for all countries and areas of the world. There are data on eight indicators: (1) women and men by marital status, (2) currently married women and men (3) ever married women and men (4) singulate mean age at marriage (5) annual number of marriages, (6) crude marriage rate, (7) annual number of divorces (8) crude divorce rate. For each of these indicators, data are presented for the closest date available around five reference dates: the nearest year to 1970, 1985, 1995, and the two most recent available years after 1999, depending on data availability.
