Congratulations to the CFDR!

We recently received official notification that the Center will be awarded another five years of population infrastructure (R24) funding from the NIH. We appreciate all the support that we received from faculty, staff, graduate students, and administration as we prepared the grant application last winter, not to mention your involvement in previous years. As one of the reviewers noted, "This is a very strong application from a newer population center with a very promising trajectory and excellent record of research and publication...genuinely agenda-setting for the field."
