---

### **Call for Papers: 2014 Eastern Sociological Conference – Due October 8<sup>th</sup>**

#### **Title: Second Shift and Well-Being**

The influential book titled *Second Shift* by Hochschild (1989) has received a lot of attention in sociological literature, mainly in sociology of family. The idea of second shift is based on tensions experienced within American families between the demands of work and the demands of childcare and housework. With this year's theme "Invisible Work" in mind, this regular paper session welcomes theoretical, methodological, qualitative or quantitative research that explores the effect of so-called invisible work (i.e., second shift) on individuals' well-being and/or their children's well-being. For those interested, please send Dr. Deniz Yucel, the organizer, your abstract of not more than 300 words to [yuceld@wpunj.edu](mailto:yuceld@wpunj.edu) no later than October 8, 2013. Abstracts that are not accepted can then be submitted for general placement into the regular abstract system at [essnet.org](http://essnet.org).

---
