

CFDR Update: March 16, 2018

ICPSR Short Workshops on Methods and Statistics

ICPSR Summer Program short workshops are designed to provide the practical knowledge and hands-on skills needed to apply complex methods to research. From May through August 2018, the Summer Program offers 45 short workshops in 11 cities across the US, Canada, and Europe. The short workshop schedule covers a broad range of quantitative topics--from introductory-level material to advanced, cutting-edge statistical techniques--as well as qualitative and mixed methods.
