CS 4170: INTRODUCTION TO PARALLEL COMPUTING

Semester Hours: 3.0  
Contact Hours: 3

Coordinator: Hassan Rajaei

Text: An Introduction to Parallel Programming

Author(s): PETER S. PACHECO

Year: 2011

SPECIFIC COURSE INFORMATION

Catalog Description:
Principles and practice of parallel computing. Parallel program design, implementation and evaluation of parallel programs for shared memory, local memory and vector architectures. Prerequisite: CS 3270 or CS 3080.

Course type: ELECTIVE

SPECIFIC COURSE GOALS

- I can design, implement, test and debug a parallel application program using MPI.
- I can design, implement, test and debug a parallel application program using OpenMP.
- I can parallelize an existing application using an appropriate parallel programming paradigm.
- I can develop and analyze a parallel algorithm using the PRAM model.

LIST OF TOPICS COVERED

- Introduction and overview of parallel programming
- Performance measures
- Parallel architectures
- Programs amenable to parallel programming solution
- Programming languages for parallel programming
- Program portability issues
- Operating system issues
- Tools for parallel programming
- Parallel Algorithms
- Parallelizing serial programs
