Blockbuster Hollywood films have always influenced and reflected cultural beliefs about gender politics. For the most part: men are heroes, women are damsels in distress. But, over the last two decades, numerous female characters have begun to challenge this sexist logic and have successfully headlined their own adventures. Some of the most notable action heroines in recent years have been the teenage protagonists featured in the films The Hunger Games, Divergent and Snow White and The Huntsman. These three women present a version of feminism for young viewers that wrestles with the cultural principles of neoliberalism and postfeminism to ultimately inspire a progressive model of “girlhood” that is unlike anything before.
