Binder of a Lifetime workshops give you “peace of mind,” allowing you to start or enhance comprehensive information gathering (history, household information, health care decisions, end-of-life wishes, reflections, key details, etc.) about you and your household.

One of the better-known benefits of volunteering is the impact on the community. Unpaid volunteers are often the glue that holds a community together. Volunteering allows you to connect to your community and make it a better place. Even helping out with the smallest tasks can make a real difference to the lives of people, animals, and organizations in need. And volunteering is a two-way street: It can benefit you and your family as much as the cause you choose to help. Dedicating your time as a volunteer helps you make new friends, expand your network, and boost your social skills. This series will focus on the purpose behind volunteering, how to pick the best organization for your interests and it will allow you to discover opportunities that are available in your communities.

This series will share a behind the scenes look at the workings of our county courts and will provide a better understanding of our legal system.

FALL SEMESTER 2022
Course Offerings

The Justice System: County Courts

Session One: Judge David Woessner: Probate and Juvenile courts can impact nearly every facet of our lives – from birth to death (and even before and beyond). Referred to typically as the “quiet courts” little is regularly heard about them. Judge Woessner will provide a lively overview of the many topics which both courts deal with on an every day basis.

Session Two: Judge Molly Mack: While most people think of criminal cases when they think of the court system, common pleas courts also resolve conflicts between two or more individuals or institutions on a daily basis. The Wood County Common Pleas Court handles civil cases involving contracts, personal injury, foreclosures, as well as countless other civil injuries. Judge Molly Mack will provide a lively discussion of the civil litigation process from the filing of a complaint through appeal, including the mechanics of the civil litigation.

Session Three: Judge Matthew Reger: The Criminal Justice System in the United States is the most prominent when people think of courts. It is the one that, many times, has the most drama, controversy, and Constitutional implications. But what really happens in the criminal justice system – from the point of being charged to either an acquittal or conviction and sentence – and how does that impact every citizen? Judge Reger will provide a broad based, engaging, and thoughtful presentation on the criminal justice system, its procedures, and a few great stories along the way. Participants will walk away from this presentation with a better understanding of the American criminal justice system and a unique perspective from someone with over 25 years of experience.

From Arnold Schwarzenegger to Christoph Waltz, from Wiener Schnitzel to Red Bull, from Mozart to Falco, from mountains to lakes. Austria with its 9 million inhabitants represents people, food, culture and nature in a unique way. Austria is 60 percent covered by the Alps, where people enjoy hiking in summer and skiing in winter. Culture lovers will find their way to the cities, where they can follow in the footsteps of Mozart (1756-1791) in Salzburg or the Habsburgs (1278-1918) in Vienna. Austria is part of the European Union and although it is a small country compared to its neighbors France or Germany (ten times larger), its economy is stable and thriving, its social system is one of the best in the world and education is almost free. Austrians are generally relaxed, sociable people who love nature as much as a good cup of coffee in a café. Fun fact: Almost no one in Austria has ever seen "The Sound of Music".
