

Telehealth Services

A Convenient Way to Stay Connected with Your Providers

Telehealth appointments allow you to stay connected with your providers and obtain needed medical care through live video chats using a computer or mobile device.

What is telehealth?

Telehealth visits are a virtual way to connect with your healthcare providers. Telehealth visits can be done by computer, tablet or smartphone. Visits include both an audio and visual component, meaning you can see and hear your provider during the visit, just as if you were talking face to face.

Are telehealth visits covered under my plan?

As with any health benefit, your plan determines how virtual visits are covered. Generally speaking, scheduled virtual visits are covered the same as a standard office visit. You can use telehealth for on-demand and scheduled visits for routine care for acute conditions, such as a sore throat or sinus infection, or chronic health conditions, such as diabetes or high blood pressure. Behavioral health visits are not covered in on-demand settings.

Do I need to make an appointment for a telehealth visit?

You can make an appointment for a telehealth visit with your provider just like you would schedule a regular office visit. This is called a scheduled telehealth visit.

If you need to speak to a healthcare provider right away, you can use an on-demand telehealth service, if it is covered by your plan. An on-demand telehealth visit is similar to walking in to an urgent care center. You do not need to schedule an appointment. You can log in for a telehealth visit anytime and you will be assigned to the first available provider. Contact your local in-network hospital system or check their website to find out if they offer on-demand telehealth visits.

Note: Please check your benefit documents by logging in to My Health Plan or call Customer Care using the number on your ID card.

What is the cost for a telehealth visit?

The amount you pay for a telehealth visit depends on your benefit plan. Typically, the copay for a telehealth visit would be the same as the copay for a standard office visit. If your plan includes on-demand telehealth visits, the copay may be different than a standard office visit. Please check your benefit documents by logging in to My Health Plan or call Customer Care using the phone number listed on your ID card.

Do I need any special equipment to participate in a telehealth visit?

Telehealth visits can be done through a smartphone, tablet or computer. Most devices have cameras built in, or you can use a standalone webcam. Your healthcare provider will let you know what you'll need to connect for your telehealth visit. It usually involves downloading a mobile app, such as FaceTime or Zoom, or logging in to a website. Some providers may use an online tool that is part of an electronic health record. You may be required to complete a registration process prior to your appointment.

How should I prepare for a telehealth visit?

Prepare for your telehealth appointment the same as you would for a face-to-face visit with your provider. Here are a few tips:

- Be prepared to explain your symptoms and any health concerns you are having
- Make a list of medications or supplements you're taking and ask for refills, if needed
- Note any allergies and discuss them with your provider

In addition, you should check your internet connection and test your camera before logging in for your telehealth visit. Try to find a quiet space for your telehealth visit where you can have a private conversation with your provider.

Please keep in mind that a telehealth visit may not always be appropriate for your medical condition and you may need to see your provider in person to receive treatment. If you have questions about your telehealth benefits, please call Medical Mutual Customer Care at the number on your ID card.
