Invest in your retirement—and yourself—today, with help from the BGSU Alternative Retirement Plan and Fidelity.
Invest some of what you earn today for what you plan to accomplish tomorrow.

Dear Employee:

Your Bowling Green State University Alternative Retirement Plan offers outstanding convenience and a variety of investment options. Take a look and see what a difference enrolling in the plan through Fidelity could make in achieving your goals.

**Benefit from:**

**Contributions from BGSU.** When you contribute to the plan BGSU helps your contributions grow by making a University contribution in an amount equal to 14% of your eligible compensation.

**Tax savings now.** Your contributions are deducted from your pay before income taxes are taken. This means that you can actually lower the amount of your current income taxes paid each pay period. This means more money in your take-home pay versus saving money in a taxable account.

**Tax-deferred savings opportunities.** You pay no taxes on BGSU’s contributions to the Plan or any earnings until you withdraw them from your account, enabling you to keep more of your money working for you now.

**Retirement planning tools.** You have access to online tools designed to help you manage your assets as you plan for retirement.

**Convenience.** Your contributions are automatically deducted regularly from your paycheck.

**Portability.** You can roll over eligible savings from another BGSU service provider or a previous employer into this Plan. You can also take your plan vested account balance with you if you leave the company.

**Online beneficiary.** With Fidelity’s Online Beneficiaries Service, you can designate your beneficiaries, receive instant online confirmation, and check your beneficiary information virtually any time.

To learn more about what your plan offers, see “Frequently asked questions about your plan” later in this guide.

Frequently asked questions about your plan.

Here are answers to questions you may have about the key features, benefits, and rules of your plan.

When can I enroll in the plan?
You must select a provider and enroll in a Plan within 120 days of your initial employment. If no election is made you will be automatically enrolled in the Ohio Public Employees Retirement System or State Teachers Retirement System of Ohio.

How do I enroll in the Plan?
First, contact BGSU to obtain a Salary Reduction Agreement (SRA) form to begin contributions once your account is established at Fidelity. After the SRA has been submitted, enrollment in the plan at Fidelity can be done in 5 simple steps:

1. Obtain your Fidelity Plan ID: 88996
2. Log On: http://enrollonline.fidelity.com
3. Account Setup: Provide us with your personal information and custodial consent.
4. User Registration: Select a User Name and Password to access your account online and Log On.
5. Enroll in the Plan: Choose the mix of investment options you would like to have contributions directed to in the Plan.

Once you have enrolled in the Plan you can access your account ongoing by logging on to Fidelity NetBenefits® at www.netbenefits.com.

How much can I contribute?
The amount you can contribute to the Plan can change each year based on Ohio Legislation. Your human resources office can confirm the current contribution rate when you submit your SRA.

When is my enrollment effective?
Your enrollment becomes effective with the first paycheck after your date of hire. If you are a current active employee choosing to switch from another Alternative Retirement Plan provider to Fidelity, your enrollment becomes effective with the first paycheck following the completed forms.

Does the University contribute to my account?
Yes, the University contributes an amount equal to 14% of your eligible compensation each pay period to your selected retirement plan, subject to increase or decrease based on applicable law and retirement system mandates.

How do I designate my beneficiary?
If you have not already selected your beneficiaries, or if you have experienced a life-changing event such as a marriage, divorce, birth of a child, or a death in the family, it’s time to consider your beneficiary designations. Fidelity’s Online Beneficiaries Service, available through Fidelity NetBenefits®, offers a straightforward, convenient process that takes just minutes. Simply log on to NetBenefits® at www.netbenefits.com and click on “Beneficiaries” in the About You section of Your Profile. If you do not have access to the Internet or prefer to complete your beneficiary information by paper form, please contact 1-800-343-0860.

What are my investment options?
To help you meet your investment goals, the Plan offers you a range of options. You can select a mix of investment options that best
suits your goals, time horizon, and risk tolerance. The many investment options available through the Plan include conservative, moderately conservative, and aggressive funds. A complete description of the Plan’s investment options and their performance, as well as planning tools to help you choose an appropriate mix, are available online at Fidelity NetBenefits.

**Fidelity Freedom® Funds.** The Plan also offers the Fidelity Freedom® Funds that offer a blend of stocks, bonds and short-term investments within a single fund. Each Freedom Fund’s asset allocation is based on the number of years until the fund’s target retirement date. The Freedom Funds are designed for investors who want a simple approach to investing for retirement. Lifecycle funds are designed for investors expecting to retire around the year indicated in each fund’s name. The investment risk of each lifecycle fund changes over time as each fund’s asset allocation changes. The funds are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risks associated with investing in high yield, small cap, commodity-linked and foreign securities. Principal invested is not guaranteed at any time, including at or after the fund’s target date.

**What if I don’t make an investment election?**

We encourage you to take an active role in the BGSU Alternative Retirement Plan and choose investment options that best suit your goals, time horizon, and risk tolerance. If you do not select specific investment options in the Plan, your contributions will be invested in the Fidelity Freedom® Fund with the target retirement date closest to the year you might retire, based on your current age and assuming a retirement age of 65, at the direction of Bowling Green State University. Please refer to the chart in the Investment Options section for more detail.

If no date of birth or an invalid date of birth is on file at Fidelity your contributions may be invested in the Fidelity Freedom® Income Fund. For more information about the Fidelity Freedom® Fund options, log into www.netbenefits.com.

**How much should I save for retirement?**

Fidelity’s planning tools are designed to help you manage your assets as you plan for retirement. Simply log on to Fidelity NetBenefits at www.netbenefits.com to access these tools.

**When am I vested?**

When you are vested it means the money in your plan is yours to keep if you separate from service. The BGSU Alternate Retirement Plan states that you are immediately 100% vested in the entire amount in your account.

**Can I take a loan from my account?**

Loans are not available in this plan.

**Can I make withdrawals?**

Withdrawals from the Plan are generally permitted when you retire, become permanently disabled, as defined by your plan.

**Can I move money from another retirement plan into my account in the BGSU Alternative Retirement Plan?**

You are permitted to roll over eligible pretax contributions from another 401(k) plan, 401(a) plan, 403(b) plan or a governmental 457(b) retirement plan account or eligible pretax contributions from conduit individual retirement accounts (IRAs). A conduit IRA is one that contains only money rolled over from an employer-sponsored retirement plan that has not been mixed with regular IRA contributions.

Fidelity® Conservative Income Bond Fund

VRS Code: 02267

Fund Objective: The fund seeks to obtain a high level of current income consistent with preservation of capital.

Fund Strategy: Normally investing at least 80% of assets in U.S. dollar-denominated money market and high quality investment-grade debt securities of all types, and repurchase agreements for those securities. Normally investing in fixed rate securities with a maximum maturity of two years or less and floating rate securities with a maximum maturity of three years or less. Normally maintaining a dollar-weighted average maturity of 0.75 years or less. Investing up to 5% in lower quality investment-grade securities and potentially investing in reverse repurchase agreements. Investing more than 25% of total assets in the financial services industries. Investing in both domestic and foreign issuers.
Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Foreign securities can be more volatile than U.S. markets due to increased risks of adverse issuer, political, regulatory, market or economic developments. Changes in government regulation, interest rates and economic downturns can have a significant effect on issuers in the financial services sector, including the price of their securities or their ability to meet their payment obligations. Prepayment of principal prior to a security’s maturity can cause greater price volatility if interest rates change. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-settling securities) which may increase market exposure, magnify investment risks, and cause losses to be realized more quickly. The fund is not a money market fund and will have a fluctuating NAV.

Fund short term trading fees: None

Who may want to invest:
- Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

Footnotes:
- A mutual fund registered under Fidelity Contrafund, and managed by Fidelity Management & Research Company. This description is only intended to provide a brief overview of the fund. Read the fund’s prospectus for more detailed information about the fund.
- Weighted average maturity (WAM) is the weighted average of all the maturities of the securities held in a fund. WAM for money market funds can be used as a measure of sensitivity to interest rate changes. Generally, the longer the maturity, the greater the sensitivity. WAM for money market funds is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening devices, such as demand features and interest rate resets. For bond funds, WAM can be used as a measure of sensitivity to the markets. Generally, the longer the maturity, the greater the sensitivity. The WAM calculation for bond funds excludes interest rate resets and only takes into account issuer call options if it is probable that the issuer of the instrument will take advantage of such options.
- Fidelity is voluntarily reimbursing a portion of the fund’s expenses. If Fidelity had not, the returns would have been lower.

Fidelity® Contrafund®
VRS Code: 00022

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing in securities of companies whose value FMR believes is not fully recognized by the public. Investing in either ‘growth’ stocks or ‘value’ stocks or both. Normally investing primarily in common stocks.

Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to the activities of individual companies, and general market and economic conditions. Investments in foreign securities involve greater risk than U.S. investments. You may have a gain or loss when you sell your shares.

**Fund Strategy:** Normally investing at least 80% of assets in investment-grade corporate bonds and other corporate debt securities and repurchase agreements for those securities. WAM for money market funds can be used as a measure of sensitivity to interest rate changes. Generally, the longer the maturity, the greater the sensitivity. WAM for money market funds is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening devices, such as demand features and interest rate resets. For bond funds, WAM can be used as a measure of sensitivity to the markets. Generally, the longer the maturity, the greater the sensitivity. **Fund Strategy:** Investing primarily in companies engaged in the regional, national, and international movement of passengers, mail, and freight via aircraft. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.

**Fund Risk:** The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund; thus changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund. The air transportation industry can be significantly affected by competition within the industry, domestic and foreign economies, government regulation, labor relations, and the price of fuel.

**Fund Risk:** The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund; thus changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund. The consumer discretionary industries can be significantly affected by the performance of the overall economy, interest rates, competition, consumer confidence and spending, and changes in demographics and consumer tastes.

**Fund short term trading fees:** This fund has a Short-term Redemption Fee of 0.75% for fee eligible shares held less than 30 days.

**Who may want to invest:**
- Someone who is willing to accept the potentially lower diversification and higher risks associated with investing in a particular industry or sector.
- Someone who is seeking to complement his or her core holdings with investments concentrated in a particular sector or industry.

Because FMR concentrates the fund's investments in a particular industry, the fund's performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund; thus changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund. The medical equipment and systems industry can be significantly affected by patent considerations, rapid technological change and obsolescence, government regulation, and government reimbursement for medical expenses.

Fidelity® Select Money Market Portfolio

VRS Code: 00085

**Fund Objective:** Seeks to provide high current income, consistent with preservation of capital and liquidity.

**Fund Strategy:** Invests in U.S. dollar-denominated money market securities of domestic and foreign issuers and repurchase agreements, and also may enter into reverse repurchase agreements for the fund. Invests more than 25% of total assets in the financial services industries. Investing in compliance with industry-standard requirements for money market funds for the quality, maturity, and diversification of investments.

**Fund Risk:** An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at $1.00 per share, it is possible to lose money by investing in the fund. The rate of income will vary from day to day, based on changes in interest rates and market conditions. Changes in government regulation and interest rates and economic downturns can have a significant negative effect on issuers in the financial services sector. Investments in foreign securities involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. A decline in the credit quality of an issuer or the provider of credit support or a maturity-shortening structure for a security can cause the price of a money market security to decrease.

- Someone who has a low tolerance for investment risk and who wishes to keep the value of his or her investment relatively stable.
- Someone who is seeking to complement his or her bond and stock fund holdings in order to reach a particular asset allocation.

- Weighted average maturity (WAM) is the weighted average of all the maturities of the securities held in a fund. WAM for money market funds can be used as a measure of sensitivity to interest rate changes. Generally, the longer the maturity, the greater the sensitivity. WAM for money market funds is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening devices, such as demand features and interest rate resets. For bond funds, WAM can be used as a measure of sensitivity to the markets. Generally, the longer the maturity, the greater the sensitivity. The WAM calculation for bond funds excludes interest rate resets and only takes into account issuer call options if it is probable that the issuer of the instrument will take advantage of such options.

**VRS Code:** 01329

**Fund Objective:** Seeks reasonable income. The fund will also consider the potential for capital appreciation.

**Fund Strategy:** Normally investing at least 80% of assets in equity securities. Using a neutral mix of approximately 50% common stocks, 15% REITs and other real estate related investments, 15% convertible securities, and 20% preferred stocks. Investing the fund’s assets with a focus on equity securities that pay current dividends and show potential for capital appreciation, which tends to lead to investments in “value” stocks in the common stock category.

**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Fidelity® Strategic Income Fund
VRS Code: 00368

Fund Objective: Seeks a high level of current income. The fund may also seek capital appreciation.

Fund Risk: Stock markets, particularly foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Leverage can increase market exposure and magnify investment risk.

Fund short term trading fees: None

Who may want to invest:

Fidelity® Strategic Real Return Fund
VRS Code: 01505

Fund Objective: Seeks real return consistent with reasonable investment risk.

Fund Strategy: Allocating the fund’s assets among four general investment categories, using a neutral mix of approximately 30% inflation-protected debt securities, 25% floating-rate loans, 25% commodity-linked derivative instruments and related investments, and 20% REITs and other real estate related investments. Investing in domestic and foreign issuers. Analyzing a security’s structural features and current pricing, its issuer’s potential for success, and the credit, currency, and economic risks of the security and its issuer to select investments. Using fundamental analysis of factors such as each issuer’s financial condition and industry position, as well as market and economic conditions, to select investments. Investing in Fidelity’s central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or investment disciplines).

Fund Risk: Stock markets, particularly foreign markets, are volatile and can be affected by adverse issuer, political, regulatory, market, or economic developments. Floating rate loans may not be fully collateralized and therefore may decline significantly in value. A floating rate loan may not be fully collateralized which may cause the loan to decline significantly in value. A floating rate loan is generally subject to restrictions on resale. Difficulty in selling a floating rate loan may result in a loss. Interest rate increases can cause the price of a debt security to decrease. Increases in real interest rates can cause the price of inflation-protected debt securities to decrease. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Commodity-linked investments can be more volatile and less liquid than the underlying instruments or measures and their value may be affected by the performance of the overall commodities baskets as well as weather, tax, and other regulatory developments. Spartan® Inflation-Protected Bond Index Fund - Fidelity Advantage Class

VRS Code: 02416

Fund Objective: Seeks to provide investment results that correspond to the total return of the inflation-protected sector of the United States Treasury market.

Fund Strategy: Normally investing at least 80% of assets in inflation-protected debt securities included in the Barclays U.S. Treasury Inflation-Protected Securities (TIPS) Index (Series-L). Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. Fund Objective: Seeks to provide investment results that correspond to the aggregate price and interest performance of the debt securities in the Barclays U.S. Aggregate Bond Index.

Fund Strategy: Normally investing at least 80% of the fund’s assets in bonds included in the Barclays U.S. Aggregate Bond Index. Using statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality, to attempt to replicate the returns of the Index using a smaller number of securities. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default) and futures contracts - and forward-settling securities, to adjust the fund’s risk exposure. Investing in Fidelity’s central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or investment disciplines).

Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-settling securities) which may increase market exposure, magnify investment risks, and cause losses to be realized more quickly.

Fund short term trading fees: None

Who may want to invest:
- Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

For 403(b)-to-403(b) vendor or contract exchanges

☐ I understand that any balances I am exchanging from a 403(b)(1) annuity into a 403(b)(7) custodial account may be subject to more restrictive withdrawal provisions.

☐ I understand that if I exchange a contribution source that is not allowed by the Plan, the value associated with the unacceptable source will be returned to the investment provider named in Section 2.

☐ I direct Fidelity to treat all monies as pretax contributions made subsequent to 12/31/88 unless my prior investment provider provides Fidelity with account balances as of 12/31/88 and post-1988 salary reduction contributions.

☐ I direct Fidelity to treat the entire balances as subject to minimum distribution requirements unless my prior investment provider provides Fidelity with account balances as of 12/31/86.

☐ I direct Fidelity to allocate the entire balance to the most restrictive source in the current employer's plan unless my prior investment provider provides Fidelity with the sources of the exchanged amount under the previous plan.
