

MOON RISE AND SET TIME WHEEL

1. It is best to print the templet out card stock. If card stock is not available, cut each section out and glue to a manila folder
2. Using a small paper fastener, place the semi-circle on the larger circle.
3. Place a phase of the Moon on the Eastern Horizon
The arrow in the middle of the dial indicates the time that particular phases of the Moon rises. Placing a phase of the Moon on the western horizon, the arrow indicates the time that phase sets.

(EX: the First Quarter Moon rises at Noon)

Or

- Place a phase of the Moon so that the meridian arrow points to it.
The arrow indicates the time that phase of the Moon is due south.
(EX: the full Moon is due south at Midnight)
