

STAR CLOCK

1. If possible print the star clock on card stock. If card stock is not available then cut out the circles and glue them to a manila folder. Glue the Star Clock page to another piece of card stock
2. With the small circle on top, place a paper fastener through the center of each circle and then through the small black dot on the full paper.
3. To use the Start Clock
 - a. Set the approximate day of the month by rotating the larger circle
 - b. Locate the Big Dipper in the evening sky.
 - c. Rotate the smaller circle until the Big Dipper on the circle has the same orientation as the Big Dipper is in the sky
 - d. The time arrow points to the approximate time of "day"
