What’s golden?
Introductions

• Jonathan Bostic
• Jessica Belcher
• Christy Miller
• Sherry Lane
Agenda

• Introductions and Norms
• Morning Jumpstart: Number Talk
• Activity: Inequalities
• Lesson Reflection: Reflecting on SMCs and SMPs
• Lunch
• Launch after Lunch: Black and white hats
• Activity: Geometric representation of radicals
• Lesson Reflection: Reflecting on SMCs and SMPs
• Lesson Planning
• Daily Evaluation
Evolving Norms for this PD

- We will be ready for class and use our class time effectively.
- We will keep our focus on learning and use technology for personal reasons during breaks.
- We will be respectful of each other’s time and space and work efficiently.
- We will actively participate by (a) listening to each other, (b) giving others our attention, (c) not speaking when someone else is talking, and (d) regularly sharing our ideas in class.
- If we disagree with someone or are unclear, we will ask a question about his or her idea and describe why we disagree or are confused.
- We will ask questions when we do not understand something. We will comment on others’ ideas rather than the person.
Evolving Norms for this PD

- We will take advantage of opportunities to share ideas and gather feedback through presentations.
- We will encourage one another to share ideas.
- We will show our appreciation to one another for their ideas.
- If we disagree with someone or are unclear about their ideas related to mathematics content and pedagogy, we will ask a question about his or her idea and describe why we disagree or are confused.
- We will ask questions when we do not understand something about mathematics content and pedagogy.
- We will comment on others’ ideas about mathematics content and pedagogy rather than the person.
Evolving Norms for this PD

• We will always look for another approach to solve problems.
• We will use pictures, graphs, tables, symbols, numbers, manipulatives, and/or words to assist us while doing mathematics.
• We will persist with every problem and examine it from multiple perspectives.
• We will be mathematically precise whenever possible.
• We will explain and justify our ideas in a way that everyone can understand.
• We will engage in rough-draft talk and encourage others to do so as well.
Morning Jumpstart: Number Talk
Reflecting on SMCs and SMPs

- Share across your table with different SMPs and SMCs addressed by today’s activities.
  - Be purposeful indicating what specific behaviors or habits led you to conclude that you engaged in a specific SMP.
  - Similarly, what did the instructor(s) do to encourage/foster/facilitate that SMP?
  - In what ways could we UDL this lesson?
    - UDL = Universal Design for Learning. We will explore this more deeply later today.
Lesson Reflections

Lessons

• You will design **one Expression and Equations (EE) lesson** to implement next academic year. Work on this lesson will be done in grade-level teams.
  
  – Special education teachers are encouraged to work with those they tend to collaborate with most often, students they tend to see more frequently, or content that seems most unclear. You are still expected to author one EE lesson.

  – Each teacher is responsible for one lesson; however, the team’s lessons should be organized as part of a series of lessons that the grade-level teams could pick up and use in its entirety.
Lessons

• Lessons may use tasks from online/NCTM/books but they must be different in some way.
• TTLP questions must be clearly addressed. Copy and paste the question from the TTLP into your lesson so the reader knows its focus.
• You must address at least one bullet from each section within Parts 1 and 2.
• You must address two bullets from Part 3.
• You may use the provided BGSU lesson plan template or another lesson plan template as a way to frame your lesson.
Lessons

• Technology and other resources are encouraged.
• SMPs and SMCs must be indicated in the lesson.
• Assessment of some kind (questions, worksheet, brief quiz, etc.) must be provided.
• As a group, you must have a grade-level academic language support document. This should include words, definitions, examples, and if possible, ways to contextualize the word in a math task other than the one in the lesson. Hyperlinks to resources are encouraged.
Take Care

• Please complete the exit ticket and place it on the parking lot.
• Please help us keep the room in order by throwing away any trash and tidying your area.
• Bring snacks, drinks, and/or other food to share for Lesson study!
• See you tomorrow. Travel safely!
