

The CLA+ is a performance-based assessment that measures critical thinking, problem-solving, analytical reasoning, and writing skills. The CLA+ reports at the school level, rather than the student level. The purpose of this assessment is to help BGSU gauge its performance in helping students develop critical thinking, analytic reasoning, problem solving, and written communication skills. The Office of Academic Assessment administers the CLA+ to 100 first-year students in the fall and 100 seniors in the spring.

2017

Bowling Green State University has a freshman Total CLA+ score of **1089**; this score is greater than or equal to the average freshman score at **73%** of CLA+ schools. A score of 1089 demonstrates **Basic** mastery of the critical thinking and written-communication skills measured by CLA+.
