We Do It For The Water  
**Dr. Roxanne Ornelas, Miami University, Geography**

**Tuesday, November 28  6:00 PM—7:30 PM**  
Bowen-Thompson Student Union 308

For over 15 years a group of indigenous women “water walkers” have walked around all five of the Great Lakes and the length of several rivers in the United States and Canada. Most recently, the water walkers walked the entirety of the longest river in the United States, the Missouri River. The women, children, and men who joined with them along the way are motivated by their belief that water is sacred and must be protected and ministered to. Integrated into their environmental justice activism is a commitment and a sense of responsibility to protect water and other natural resources for those who will be living seven generations into the future. Persistent water diversion projects, mining operations, fracking, drought, and agricultural runoff, to name a few challenges, are threatening the health and accessibility of global fresh water resources. Dr. Roxanne Ornelas is a water walker. She will discuss the traditional ecological knowledge that directs the water protectors to teach others about the importance of safeguarding water.
