BOWLING GREEN STATE UNIVERSITY
OFFICE OF THE PRESIDENT

On behalf of Bowling Green State University, I want to welcome you to Bowling Green. We are so glad your search has brought you here!

As you continue your process in finding the right college for you, you're likely exploring several options. Of course, we hope you choose Bowling Green, but regardless of where you go, I want you to know this: How you go to college matters, and I encourage you to look for a university that prioritizes your educational experience.

All of higher education knows how important a student's experience is when it comes to their success. At Bowling Green, we've actually done something about it. We call it Career and Life Design, and it is our investment in you, ensuring you're personally supported as you navigate college and career. It's why Bowling Green was recently named among the top 10 public universities in the nation for the first-year experience, according to U.S. News and World Report, along with universities like the University of Southern California, the University of Michigan, the University of Virginia and Auburn University.

At Bowling Green, students are in the driver's seat of their education, empowered to design their experience. Students work 1:1 with college and career coaches, more commonly found at smaller, private colleges, to ensure they're supported, connected and successful. What makes Bowling Green so special is the level of intentional support, matched with a university that offers the kind of experiences, opportunities and connections you can only find at a large, comprehensive research university. It's the best of both worlds, all at a university that's known for its kind, supportive environment in one of America's best and safest college towns.

We're proud more students than ever are choosing – and staying – at Bowling Green, ranking us among the **Top 5 universities in the nation – and No. 1 in Ohio – that students say they would choose again**, according to the Wall Street Journal, a student rating we've received for six years in a row.

During your visit today, I hope you'll ask questions and make connections with our students, faculty and staff. We're here for you! If I can answer questions you have about Bowling Green, please email me at **rrogers@bgsu.edu**. Ay Ziggy Zoomba!

Regards,

Rodney K. Rogers, Ph.D.
President

YOUR EDUCATION IS AN INVESTMENT IN YOUR FUTURE:

Maximize it with Career and Life Design

AT BOWLING GREEN STATE UNIVERSITY

Why Career and Life Design?

We know – and national research shows – that when it comes to students' long-term success in career and life, it isn't where, but how you go to college that matters most.

While all universities know this, most stop short of equipping students with the tools they need to get the most out of their college experience. At Bowling Green, our answer is Career and Life Design – a program that ensures students know all that is available at Bowling Green AND are given the tools and skills to access those opportunities.

It's especially effective at Bowling Green, because we're the perfect size – big enough to offer all the opportunities of a large school but small enough that each student can actually take advantage of them without competing with 50,000+ other students to make connections and stand out.

With Career and Life Design, every student can work with college and career coaches to help make connections across campus and in their careers, from finding a community where they'll belong and grow to building a professional network with employers, alumni and industry leaders through internships, mentoring, networking, hands-on projects and career opportunities.

What is it?

A four-year, comprehensive program that gives students the tools they need to take full advantage of their college experience, from day one through graduation and into their career.

How do we do it?

Students can work 1:1 with coaches, attend group sessions and take specially designed Career and Life Design courses throughout their college experience that put them in the driver's seat of their education. Using design thinking – a framework of skills developed and widely used by businesses – students gain the skills to approach their college experience with intention, focused from day one on why they're in college. They'll also gain the skills we know employers are looking for: communication, collaboration, critical thinking and more. It's why we're ranked both the No. 1 public university in Ohio for career preparation and a nationally recognized university for the student experience.

WONDERING HOW TO MAKE CONNECTIONS ON CAMPUS?

We have teams of coaches who will get to know you and help make connections with student organizations and clubs, faculty in your areas of interest, alumni and community leaders and more. We know the lifelong benefits of a college education are even greater than what happens in the classroom, and that's why we're nationally ranked for our student experience.

NOT SURE WHAT YOU WANT TO MAJOR IN, OR MAYBE YOU'VE CHANGED YOUR MIND?

We don't leave you to figure it out on your own, changing major after major – we'll support you as you identify what you want to do in your career and connect you with the students, faculty and staff on campus who can help. It's support that's driving record graduation rates, with more than 75% of our graduates now earning their bachelor's degrees in four years or less.

NEED SUPPORT TRANSITIONING TO THE COLLEGE ENVIRONMENT?

For many students – if not all – college can be a big change. We'll make sure you are supported with the tools to navigate new experiences and environments – tools that you'll have for life. Our faculty and staff are here for you. It's why Bowling Green is ranked the No. 1 public university in Ohio for student opportunities.

READY TO START CAREER PREPARATION?

Our career coaches will connect you with industries, businesses, organizations and communities that can help jump-start your career. Test different work environments while you're still in college to see what you like to do, gain marketable experience and get a feel for your future career. Start as early as your first semester. We're the No. 1 public university in Ohio for career prep for a reason!
